

Non-technical summary

Renewal and Amendment of License NWB2BEGEO0210 -Type “B”

Sabina Gold & Silver Corp. (Sabina) is a Canadian-owned exploration company that is actively operating the Hackett River, Back River and Wishbone projects in the Kitikmeot, Nunavut Territory. The Back River exploration project is located approximately 525 kilometres northeast of Yellowknife and is 400 kilometres south of Cambridge Bay and includes Goose Lake, George Lake, Del Lake, Boot Lake and Boulder Pond properties. Sabina is the operator for the project and is responsible for maintaining all of the project permits. As the current George Lake license with the Nunavut Water Board is expiring in 2010, Sabina is applying for amendments to extend the term of the license for another 5 years and reflect the new name of the company. There are no other changes to the license as it currently exists.

The George Lake camp will primarily be maintained as a staging area for supply flights, exploration activities and drilling operations. Sabina may drill exploration targets located in various locations on the George Lake claim group as exploration priorities dictate. Several of the areas under consideration are within a radius of up to 10 km from the existing camp at George Lake. A helicopter will be used to fly personnel to and from the area, as well as for drill support. At present, the intention is to base all personnel out of either the existing camps at Goose Lake or Hackett River, though the current camp at George Lake may be used for short periods for maintenance, support or in the event of an emergency. It is not anticipated that additional buildings will be set up.

These exploration activities are not expected to have any significant environmental impacts on animals, nor on the land or water, and no mitigation measures beyond current exploration best practices are required. Best practice guidelines to minimize disturbance to wildlife are given in the various licenses which Sabina holds, and will be followed in this operation.

Drilling services will be provided by an experienced contractor. Several Inuit employees (number to be determined) will be hired to work at Goose Lake or Hackett River camps which may include core splitting, sample shipping, camp maintenance, equipment operation, environmental monitoring and reclamation).
