Subject: Re: 2BE-GEO0210 George Lake Project renewal application

Follow Up Flag: Follow up
Flag Status: Flagged

This application is incomplete. It does not explain wildlife impacts from low level flights, it does not adequately explain what licensed facility will take the waste and it does not indicate that any community consultations have taken place. The Yellowknife mining symposium is not community consultation.

Accordingly, this is an expression of public concern and there should be a full public hearing into this renewal application.
