

Non- Technical Summary

Request to Amend 2BE-GEO1015 to Change Project Boundaries

Sabina Gold & Silver Corp. (Sabina) is a Canadian owned company actively exploring for precious metals in the Back River area of the Kitikmeot Region, Nunavut Territory about 110 km south of the community of Bathurst Inlet. Sabina has been actively exploring in the area since 2005 at the Hackett River Project and since 2009 at the Back River Project (Goose, Del, Boulder, Boot, George properties) and the Wishbone Trend (Malley and Wishbone claim groups).

Sabina sees an opportunity to continue exploration activities in the Back River area and currently holds a water license for the George Property that allows water use up to 175m³/day for exploration activities such as drilling, geophysical surveys and field programs and the operation of a main camp and temporary camps to support these activities.

This amendment request is to amend the Project boundaries for additional exploration activities and to assess the underlying ground conditions using geotechnical methods.

Several Inuit employees will be hired to help with activities associated with the construction, operation and closure of these camps. Sabina is committed to ensuring its operations minimize environmental impact and best management practices for the exploration activities will be followed.
