Subject: Submission of Spill Plans under transferal of License 2BE-GEO0210

Dear Mr. Russell:

The Nunavut Water Board ("NWB") would like to acknowledge receipt of the above documents on July 6, 2007. The document was distributed for review and comments with a submission deadline of August 13, 2007. No major concerns were expressed by the Parties.

The Spill Contingency Plan is designed to be a stand alone document specific to a particular Licence. After review it was found that the Plan was most suited to the Goose Lake camp and exploration activities. The proponent is requested to submit for approval in sixty '60' days of the date of this letter, a Spill Contingency Plan designed specifically for George Lake camp and its associated exploration drilling. The Plan should also take into account the bullets below.

Issues to be addressed in the Plan are to include:

- MSDS for all products on Site should be included in the Plan;
- Update the Spill Report Form to the new Nunavut/NWT Spill Report Form;
- More information on disposal options for contaminated soils;
- A topographic map of the George Lake camp that includes structures and water bodies;
- Section 7.2.4 bullet one should be updated as the 24 hour number must be called in event of a spill;
- Section 7.2 should assign responsibility for filling out the GN Spill Report Form;
- Update 4.0 EC 24 hour Emergencies Pager to 867-766-3737;
- Recommend the Plan to be updated to reflect comments made by INAC;

Should you have any further questions, please feel free to contact Phyllis Beaulieu, Manager of Licensing, by telephone, or by email at licensing@nunavutwaterboard.org.

Yours truly,
