Subject: RE: Goose and George Licences
 Hi David,

Yes, the KIA land use license Goose Lake (KTL304C017 dated March 17th, 2005) has been assigned from Miramar to Dundee Precious Metals as has the George Lake license (KTL304C018 dated October 24th, 2005).

Regards,

John Laitin

Subject: Goose and George Licences

Hi Terri,
 just following up to our discussion in Vancouver regarding the two above licences,

Can you confirm for me that for the Goose Licence, currently in Miramar's name, and finalizing the assignment to Dundee, that the land use permits have also been transferred over to Dundee. I think when we discussed this in Van, that we were thinking that Kinross still had the land rights in their name, I did come accross an amended land use permit for Goose that was in Miramar's name. This was dated December 2004. So, my question now is, was this KIA land use permit ever transferred over to Dundee, so that the NWB may issue the assignment to Dundee? There is no record that I have been able to find, showing that Dundee is now the holder of the land rights.

As far as the George lake file goes, there has been no activity on the file (admin wise) since the issuance of the licence. It is still in Kinross' name, so that will be up to Dundee I guess now to have the licence assigned, given of course that the land use has been transferred,

If you could get back to me on this, I will follow up. Also, copied John Laitin on the email, maybe he can start looking at things on his end.

Regards,

Dave
