

Non Technical Summary - Amendment 3 for 2BE-GOO1015

Change to Project Area and Conditions Applying to Water Use to include All-weather Airstrip and Road

Sabina Gold & Silver Corp. (Sabina) is a Canadian owned company actively exploring for precious metals in the Beechey Lake area of the Kitikmeot Region, Nunavut Territory about 110 km south of the community of Bathurst Inlet. Since 2009, Sabina has been actively exploring the Back River Project (Goose, Del, Boulder, Boot, Bathurst, and George properties) and the Wishbone Trend (Wishbone, Malley, and Needle properties).

Sabina currently holds a water license for the Goose area that allows water use for exploration activities such as drilling, geophysical surveys and field programs and the operation of a main camp and temporary camps to support these activities. This amendment request is at the request of the Nunavut Water Board to reduce the project area of the current water license in order to minimize overlap with adjacent water licenses.

Sabina also requests the amendment to the conditions applying to water use to include water use for storage, discharge, diversion/collection, and water crossings associated with exploration activities, camp and infrastructure during all phases of construction, operation and closure. This amendment would clarify and include the water use and waste disposal associated with infrastructure improvements including an all-weather airstrip, connecting road to Goose camp, rock quarries, increased fuel and supply storage and increased camp size.
