Re: Application Exempt from the Requirement for Screening pursuant to Section 12.4.3 of the NLCA: Sabina Gold and Silver Corp.'s "Winter Roads – Hackett, George and Goose Camps" Project, Kitikmeot Region

Dear Mr. Jeff Mercer:

On August 1, 2013 the Nunavut Impact Review Board (NIRB or Board) received an application from Aboriginal Affairs and Northern Development Canada (AANDC) for an extension to the Land Use Permit (No. N2010F0017) associated with Sabina Gold and Silver Corp.'s (Sabina) "Winter Roads – Hackett, George and Goose Camps" project proposal. The NIRB notes that a conformity determination from the Nunavut Planning Commission was not required for this file, as the proposed project is located within the Kitikmeot region which does not currently have an approved land use plan in place.

Please be advised that on October 19, 2009 the NIRB received an application from Indian and Northern Affairs Canada (INAC; now AANDC) for a new Land Use Permit (LUP No. N2009F0015) for the project. After reviewing the proposed project activities, and noting that components of the proposal had been previously screened under NIRB File Nos. 04RN015 and 04RN101, the NIRB consolidated the previous file information with the 2009 application under NIRB File No.: 09RN066. This consolidation was intended to: (a) recognize Sabina's 2009 acquisition of the Goose Lake and George Lake properties; (b) enable the Board to conduct a thorough screening of a subsequent LUP application that proposed the establishment of additional winter roads for the movement of supplies and fuel but which included some components that had been previously screened under the NIRB Files 04RN015 and 04RN101; and, (c) facilitate the administration of related filing and permit applications.

Additional authorization and extension requests for the various permits and licenses associated with this project have also been assessed by the NIRB following the initial screening of the project proposal (NIRB File No.: 09RN066) and are presented in Table 1.

Table 1: Additional Applications Associated with NIRB File No.: 09RN066

Authorization	Application			NIRB Decision	
	Date Received by NIRB	Type	Reason for Application	Date Issued	Type
AANDC LUP N2009F0015	October 19, 2009	Previous LUP N2004F0006; New LUP N2009F0015	Proposal for construction of winter roads	November 30, 2009	SDR
AANDC LUP N2009F0015	January 11, 2010	Amendment	New D'Arcy Lake airstrip and winter corridor connecting to pre-existing road between Hackett River and George Lake camps	February 11, 2010	Reissued November 30, 2009 SDR with new terms and conditions
AANDC LUP N2010F0017	July 6, 2010	New LUP application	Proposal to construct winter road between Bathurst Inlet and Back River Project and barge resupply to Bathurst Inlet	September 2, 2010	Reissued February 11, 2010 SDR with new terms and conditions
AANDC LUP N2004F0006 N2009F0015	January 17, 2013	Extension	Continue exploration and camp re-supply	January 19, 2011	Reissued September 2, 2010 SDR
AANDC LUP N2011F0029	November 25, 2011	Replace N2004F0006	To replace previous AANDC LUP	December 1, 2011	Reissued September 2, 2010 SDR
AANDC LUP N2009F0015	March 8, 2012	Extension	To conduct ongoing exploration activities	March 12, 2012	Reissued September 2, 2010 SDR
AANDC LUP N2009F0015	February 8, 2013	Extension	To conduct ongoing exploration activities	March 7, 2013	Reissued September 2, 2010 SDR

Notes: AANDC = Aboriginal Affairs and Northern Development Canada); LUP = Land Use Permit; NIRB = Nunavut Impact Review Board; SDR = Screening Decision Report

The current AANDC application, the original NIRB Screening Decision Reports (File Nos.: 04RN015, 04RN101, 09RN066) and related file information are available from the NIRB's online public registry at the following location:

<http://ftp.nirb.ca/01-SCREENINGS/COMPLETED%20SCREENINGS/>.

PREVIOUSLY-SCREENED PROJECT PROPOSAL:

As previously screened by the NIRB (File Nos.: 04RN015, 04RN101, 09RN066), the “Winter Roads – Hackett, George and Goose Camps” project was located within the Kitikmeot region, approximately 150 kilometres (km) south of Bathurst Inlet. The Proponent indicated that it intended to construct winter trails which connected its barge offloading area at Bathurst Inlet to the Goose Lake, George Lake and the Hackett River camps in order to facilitate the movement of supplies and fuel needed for year-round exploration activities in that area.

The activities and components associated with the proposed project as received by the NIRB on October 19, 2009 and which were screened under the consolidated NIRB file number 09RN066 included:

- Construction of winter road route between the George Lake and Goose Lake camps (per NIRB File No.: 04RN015);
- Construction of winter road route between the George Lake and Hackett River camps (approximately 60 metres in length);
- Finalized route selection to be based upon environmental conditions, determined via helicopter and/or snow machine reconnaissance trips;
- Temporary survival tents (1-2) to be established along the winter road routes, for the duration of permitted activities only;
- Redistribution of current inventory of equipment and materials (including chemicals) via Cat-haul transportation between the George Lake, Goose Lake, and Hackett River camps;
- Fuel and supplies delivered daily to personnel along the routes, with removal of waste material to camp as required;
- Clean-up of the routes in preparation for closure; and,
- Abandonment and restoration of road routes upon completion of transportation activities.

The activities and components associated with the January 11, 2010 LUP (No. N2009F0015) amendment application included:

- Construction and operation of an ice airstrip at D’Arcy Lake including:
 - Use of Hercules aircraft at airstrip,
 - Airstrip operation for up to sixty days between February 20 and May 31, 2010,
- Construction and use of a winter road route (approximately 2 km in length) between the D’Arcy Lake and the previously permitted winter road between Hackett River and George Lake camps, and,
- Conduct the proposed activities between February and May 2010.

The activities and components associated with the July 6, 2010 LUP (No. N2010F0017) application included:

- Establishment of a temporary camp at Bathurst Inlet;
- Establishment of an ice airstrip at Bathurst Inlet; and,
- Storage of fuel at Bathurst Inlet including:
 - Drummed fuel (approximately 410,000 litres diesel, 61,500 litres gasoline, 410,000 litres aviation fuel, 7500 pounds of propane and 100 pounds of acetylene) to be stored within secondary containment at the Bathurst Inlet lay down area,

- Bulk fuel (approximately 600,000 litres diesel) to be stored on barge prior to being transferred to tanks or sleighs for transport to Hackett River/Goose Lake camps via Cat-train (involves overwinter storage via barge freeze-in during the winter of 2011-2012).

The components associated with the January 17, 2011 LUP (No. N2004F0006 and N2009F0015) were to extend permits for one additional year to continue project activities in the Hackett River and Back River areas.

The components associated with the November 25, 2011 application to replace the previous AANDC LUP (No. N2004F0006), which was about to expire, with a new LUP (No. N2011F0029) to allow Sabina to continue its activities in the area.

The components associated with the March 8, 2012 and February 8, 2013 application were to extend LUP (No. N2009F0015) for one additional year to continue services between the camps necessary to support the ongoing exploration program.

CURRENT APPLICATION:

The Proponent is currently proposing to extend its AANDC LUP (No. N2010F0017) for one additional year to continue the movement of equipment and supplies, from possible barge resupply, between Bathurst Inlet and the pre-existing exploration camps in the Back River area.

Please note that Section 12.4.3 of the NLCA states that:

“Any application for a component or activity of a project proposal that has been permitted to proceed in accordance with these provisions shall be exempt from the requirement for screening by NIRB unless:

(a) such component or activity was not part of the original project proposal; or

(b) its inclusion would significantly modify the project.”

After completing a review of the information provided in support of the current application, the NIRB is of the understanding that the proposed extension does not change the general scope of the original project activities, and the exceptions noted in NLCA 12.4.3(a) and (b) do not apply. Therefore, this application is exempt from the requirement for screening pursuant to Section 12.4.3 of the NLCA and the activities therein remain subject to the terms and conditions recommended in the September 2, 2010 Screening Decision Report (enclosed).

If you have any questions or require additional clarification, please contact Catherine Braun Rodriguez, Technical Advisor, at (867) 983-4607 or crodriguez@nirb.ca.

Sincerely,

A handwritten signature in black ink that reads "Ryan Barry". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
