Subject: Solid Waste Disposal facility (SWDF) for Boston

Jack:

I have received a letter from the NWB requesting an amendment application to the water licence for the SWDF for the Boston site. I'm sure you have seen a copy. They are to respond with their requirements, however; as you will recall, in our application to KIA we mentioned that we would follow the recommendations of the Bryant report. In this context, we would potentially like to use Bryant Environmental to develop the drawings and engineering backup to the amendment application to the NWB and request your comments or concerns on this approach. This would ensure that the HBJV is following the KIA's report and hopefully speed up the approval of the SWDF application. My question then is, do you have any problems with the HBJV using Bryant Environmental to assist us in this matter? Also, can you provide a contact number for Bryant Environmental in YK?

Your quick response would be appreciated.

Regards:

Hugh
