KIA Licenses KTL304F049, KTL309F012

And

Start of operations at Malley-Wishbone
AANDC Licenses N2012C0003
KIA Licenses KTL312C004
NWB License 2BE-MLL1217

Dear Amanda,

This letter is a followup to the resumption of operations notice submitted Jan 7, 2013. This will advise you that Goose camp was opened for the season on January 22 and we anticipate a resumption of operations at the George camp on or about February 8, 2013.

The other purpose of this submission is to also provide an update to the exploration activities and plans for drilling this season. With camp opening, it is anticipated that the drillers will be arriving on site in late January to early February, with the drilling program commencing on or about February 10, 2013 for the Goose Project and mid March for George.

Exploration drilling will focus on the Goose – Boulder – Boot - George Properties. Some additional shallow drilling and test pit activities are planned for areas between these properties and Bathurst Inlet. These data will provide a better understanding current underlying ground conditions, acid rock drainage/metal leaching potential, and distance to bedrock. Current possible drill locations are presented in the attached maps.

For the 2013 program, exploration activities at the Wishbone and Bathurst Properties will be supported by the George camp and Del, Boulder, Boot, and Malley Properties exploration activities will be supported by Goose camp. No drilling is currently planned for the Wishbone-Malley Project and the focus will be regional mapping and sampling programs.

We currently anticipate closing the camps in mid to late September and will advise you of the date as we complete our exploration program for 2013. We are looking forward to a safe, successful season at our projects in the Kitikmeot Region again this year, and we look forward to continuing to work with all of you.

Should you have any questions or concerns, please do not hesitate to contact me by email at jlaitin@sabinagoldsilver.com or by telephone at 604-998-4175.

Best regards,

John Laitin,
Manager, Logistics and Technical Services
