

Non technical summary**GOT, Exploration Project**

Agnico Eagle Mines Limited (Agnico Eagle) possesses mineral properties located on Crown Lands located north and northwest of the Amaruq property at a distance between 130km to 150km of the Baker Lake community.

Exploration activities planned on these properties include prospection, till sampling, geophysical surveys (airborne and ground) and diamond drilling. The first drilling campaign is planned for 2000 meters of drilling and the scope of future exploration campaigns will be adjusted depending on the results obtained during previous activities.

The workers associated to the exploration activities in this area will be accommodated at the Amaruq camp site as for the other exploration activities in the vicinity.

Exploration activities are planned to start in summer 2019 and continue annually during the summer. A helicopter will be used for the transport of material, equipment and workers from the camp site up to the work areas.
