Hello David,

Could you please address the following requests from the KivIA as submitted on January 10, 2020:

- Section 2.1, page 7: the KivIA requests that a bullet point be added which states that “all barrels are stored with the bungs at the 3 and 9 position.”
- Section 8.1, page 23: the KivIA requests that the radio channel to be used for emergencies be added to the paragraph that discusses communication equipment.

In addition, the table of contents should include full naming of the appendices (e.g., Appendix D Material Safety Data Sheets).

The NWB requests the response on or before **September 22, 2020**.

Best regards,
Assol
