Date: Wednesday, December 09, 2009 3:19:51 PM

Hi Phyllis,
The email below from Indicator Minerals with the coordinates of the proposed camp completes the application. NIRB should be done screening in the New Year. Good to go otherwise.
Thanks
Steve

Good afternoon Steve;

I'm sorry I didn't get back to you sooner.
The proposed camp location is at **70°03'00" N 094°17'50" W**.
This puts the camp on the eastern shore of Chantrey Lake, which is on 1:50,000 NTS map sheet 057F/03.

If you need any more questions answered, I'm more than happy to help.
Best Regards,
Andrea

Subject: 2BE-GRA Indicator Minerals water licence application

Ms Maynes:
The NWB asked that I undertake a preliminary review of the above-mentioned application prior to its

distribution.

The application appears in order, however could you please provide the coordinates of the proposed camp in degrees, minutes and seconds? I see the application contains a number of coordinates for the exploration area boundaries and the remote camp questionnaire contains the approximate camp location in UTM. But the NWB licences usually use the Lat and Long version. I also see the camp location provided on the map, which is helpful but I don't want to estimate the camp's position. Finally, the general water licence application refers to 2 topo map sheets but I'm not sure which is relevant to the camp.

If you would like me to clarify, please do not hesitate to contact me.

Thank you.
