To: Ida Porter <ida.porter@nwb-oen.ca>

Hi Ida

Please, could you save this email under the Application folder for the 2BE-GRE

Thanks
Sonia

Hi Sonia,

Sorry for the delay to answer, I'm in paternity leave.

I double checked the coordinates in the renewal application and they are good. I include in this application all the Greyhound propriety. In the previous license, only a part of the propriety was covered.

Let me know if additional information are needed.

Have you an idea when the license could be emitted?

Objet : 2BE-GRE

Good Morning David

This email is regarding the Application submitted to the Board for the renewal of a licence.

During the final technical review I found that the Project coordinates in the submitted Application Form (Item 4 location of the undertaking) do not match the Water Licence Project coordinates.

This information needs to be checked in order to ensure we are talking of the correct geographical location.

Please, could you check the information?

Also, provide a simple map showing in the same map the location of the Project as it is stated in the licence and in the application for renewal.

Regards

Sonia
