Hi Sonia,

For the item 1, I can submit a revised A/R plan soon, but I would like to precise that as written in the annual report submitted to NWB, I think there is no compliance issue with this:

“According to the pictures included in the inspection report, what was seen as "casings" by the inspector are anchors used to stabilize the drill during the drilling. These anchors were at ground level and the occurrence of artesian flow is not possible.”

For the item 2, please find attached a letter from Aura Silver authorizing AEM to proceed with the NWB.

For the item 3, please find attached a letter from NPC saying the conformity determination of 2015 is still in application and the project is exempt from screening by the NIRB.

Regards,

**David Frenette**
