RE: NWB Renewal Water Licence No: 2BE-GRE2126

Dear Mr. Frenette:

Please find attached Licence No: **2BE-GRE2126** issued to Agnico Eagle Mines Limited by the Nunavut Water Board (NWB or Board) pursuant to its authority under Article 13 of the *Agreement between the Inuit of the Nunavut Settlement Area and Her Majesty the Queen in Right of Canada (Nunavut Agreement)*. The terms and conditions of the attached Licence related to the use of Water and the deposit of Waste are an integral part of this approval.

If the Licensee contemplates the renewal of this Licence, it is the responsibility of the Licensee to apply to the NWB for its renewal. The past performance of the Licensee, new documentation and information, and issues raised during a public hearing, if the NWB is required to hold one, will be used to determine the terms and conditions of the Licence renewal. Note that if the Licence expires before the NWB issues a new one, then Water use and Waste disposal must cease, or the Licensee may be in contravention of the *Nunavut Agreement* and the *Nunavut Waters and Nunavut Surface Rights Tribunal Act (Act)*. However, the expiry or cancellation of a licence does not relieve the holder from any obligations imposed by the licence. The NWB recommends that an application for the renewal of this Licence be filed at least **three (3) months** prior to the Licence expiry date. It should be noted that in accordance with Section 75(1)(a) of the *Nunavut Planning and Project Assessment Act (NuPPAA)*, the Board is not allowed to issue a permit or authorization for any project proposal that has not been submitted to the Nunavut Planning Commission (NPC) in accordance with Section 76 of *NuPPAA*.

If the Licensee contemplates or requires an amendment to this Licence, the NWB may decide, in the public's interest, to hold a public hearing. The Licensee should submit applications for amendment as soon as possible to give the NWB sufficient time to go through the amendment process. The process and timing may vary depending on the scope of the amendment; however, a minimum of **sixty (60) days** is required from time of acceptance by the NWB. It is the responsibility of the Licensee to ensure that all application materials have been received and are acknowledged by the Manager of Licensing.

Sincerely,

Lootie Toomasie
Nunavut Water Board
Chair

I. BACKGROUND

The Greyhound Project (Project) is located approximately 50 km northwest of the Baker Lake community within the Kivalliq Region of Nunavut. The property is transected by the Meadowbank Mine access road. Agnico Eagle Mines Limited (Agnico Eagle) is the Project operator and is responsible for maintaining the authorizations required to perform exploration activities on the property.

The current Water Licence, which authorizes the use of up to 100 m³ of Water per day for drilling purposes, as well as the deposit of Waste, is set to expire on October 05, 2021. To ensure continuation of its exploration activities or undertakings, Agnico Eagle has applied to the NWB to renew its Water Licence.

In the current Application, Agnico Eagle notes that the scope of activities currently authorized under Water Licence No: 2BE-GRE1621 will remain unchanged, which includes prospecting, geophysical surveying and diamond drilling, both land-based and on-ice, aimed at identifying and evaluating mineral deposits of interest, as well as the operation of helicopters. There is no camp infrastructure located at the site. All work is performed by the Agnico Eagle crews and drilling contractors based at the Meadowbank Mine. Helicopter flights to the drill sites are used for mobilization of both the equipment and the crews.

II. FILE HISTORY

Historically, the Greyhound Project has been explored by a number of companies under different Licences, as outlined in Table 1.

Table 1. Project Licensing History

Licence No.	Date Issued	Comments
2BE-GRE1012	May 31, 2010	Initial Licence issued to Aura Silver Resources Inc. (Aura) to allow for the use of 23 cubic metres of Water daily and the deposit of Waste for a Mining and Milling undertaking
2BE-GRE1314	March 4, 2013	Renewal Licence without any changes to the original scope
2BE-GRE1621	October 6, 2016	Renewal-Amendment Licence, increase of quantity of Water use to 100 m ³ / day to support Mining Undertaking
	June 28, 2021	Licence assigned from Gold79 Mines Ltd. (previously named Aura Silver Resources Inc.) to Agnico Eagle Mines Limited

III. PROCEDURAL HISTORY

On July 29, 2021, Agnico Eagle Mines Limited (Agnico Eagle or Applicant) submitted to the NWB an Application requesting to renew Water Licence No: 2BE-GRE1621. The following documents were included within the Application package:

- Water Licence Renewal Application Form;
- Non-technical Summaries in English and Inuktitut;
- NPC Determination, dated April 28, 2021;
- NIRB Screening Decision, dated May 6, 2010;
- Articles of Amalgamation, dated December 31, 2019; and
- Certificate of Status, dated June 1, 2021.

On August 3, 2021, following a preliminary internal technical review, the NWB concluded that the Application met the requirements of section 48(1) of the *Nunavut Waters and Nunavut Surface Rights Tribunal Act (NWNSTRA or Act)* and forwarded Notice of the Application to interested parties. All parties were invited to make representations to the NWB by August 31, 2021.

On August 20, 2021, the NWB received comments from Crown-Indigenous and Northern Affairs (CIRNA)¹. These comments were addressed on August 27, 2021.

Complete details on interveners' submissions received as well as the information provided for the Application are available from the NWB File Transfer Protocol (FTP) site using the following link:

<ftp://ftp.nwb-oen.ca/registry/2%20MINING%20MILLING/2B/2BE%20-%20Exploration/2BE-GRE2126%20AEM/2%20ADMIN/3%20SUBMISSIONS/>

Based on the results of the detailed assessment of the Application, including consideration of any potential accidents, malfunctions, or impacts to Water that the overall Project might have in the area, the Board has approved the Application and has issued Water Licence No: 2BE-GRE2126.

IV. GENERAL CONSIDERATIONS

The Renewal Licence No: **2BE-GRE2126** will be effective on October 6, 2021 to allow Agnico Eagle for the continuation of activities approved under the existing Licence No: 2BE-GRE1621. Since the Project activities have remained the same as with the existing or previous Licence, all terms and condition in the Renewal Licence will remain the same.

¹ CIRNA Letter, Re: Crown-Indigenous Relations and Northern Affairs Canada's Review of the Licence Renewal Application for Greyhound Project, Type B Water Licence No. 2BE-GRE1621, dated August 20, 2021

Term of the Licence

The Licensee has requested a ten (10) year term for the Renewal Licence. In accordance with Section 45 of the *Nunavut Waters and Nunavut Surface Rights Tribunal Act*, the NWB may issue a Licence for a term not exceeding twenty-five (25) years. However, the typical term for the Type “B” licences associated with exploration activities issued by the Board to date do not generally exceed five (5) years due to the volatile nature of exploration projects.

Considering this, the Board has decided to issue the Licence for five (5) years. This term will provide the Licensee with a sufficient time for continuation of exploration work and planning of future project activities.

Annual Reporting

As a requirement of section 14(1) of the *Nunavut Waters Regulations* and similar to the terms and conditions generally included in all licences issued by the NWB, the Board has included under [Part B, Item 2](#) of this Licence, requirements to submit Annual Reports for the purpose of ensuring that the NWB has an accurate annual update of the activities related to Water use and Waste disposal during each calendar year. This information is maintained on the Public Registry and is available to interested parties upon request. A “*Standardized Form for Annual Reporting*” is to be used by the Licensee and could be supplemented by additional monitoring documentation and Licensee’s annual reporting forms. The NWB Standardized Form is available from the NWB’s FTP site under the following Public Registry link at the NWB Website:

<ftp://ftp.nwb-oen.ca/other documents/Standardized Forms/>

Water Use

The previous Water Licence permitted the Licensee to use a total of one hundred (100) cubic metres of freshwater *per* day. The Licensee has not requested any changes to the total allowable Water volume use as part of the Renewal Application. No concerns were expressed by the Interveners with respect to the requested freshwater amount, or to the manner in which it is obtained or used. Therefore, the Water use condition imposed by previous Water Licence has been carried forward into the current Licence under [Part C, Item 1](#).

Deposit of Waste

All requirements pertaining to Waste management that were imposed by previous Water Licence have been carried forward into the current Licence.

Monitoring

All Monitoring requirements imposed by previous Water Licence have been carried forward into the current Licence under [Part J](#).

DECISION

LICENCE NUMBER: 2BE-GRE2126

This is the decision of the Nunavut Water Board (NWB) with respect to an application dated July 29, 2021 for a renewal of a Water Licence made by:

AGNICO EAGLE MINES LIMITED

to allow for the use of Water and the deposit of Waste during activities related to exploration that include prospecting, geophysical surveying, and land-based and on-ice drilling at the Greyhound Project located within the Kivalliq Region, Nunavut, at the following geographical coordinates:

Latitude: 64° 36' 30" N	Longitude: 96° 10' 00" W (Drilling)
Latitude: 64° 42' 30" N	Longitude: 96° 28' 00" W (Drilling)

DECISION

After having received confirmation from the Nunavut Planning Commission (NPC)² that the Application is for a proposal that has been previously reviewed by the NPC and that the conformity determinations indicating its conformity with the Keewatin Regional Land Use Plan (KRLUP) issued on February 27, 2015 and June 7, 2016 still apply, and that the proposal is subject to the terms and conditions recommended in the NIRB's May 6, 2010 Screening Decision Report No: 10EN022, the NWB decided that the Application could proceed through the regulatory process. In accordance with S.55.1 of the *Nunavut Waters and Nunavut Surface Rights Tribunal Act (Act)* and Article 13 of the *Nunavut Agreement*, public notice of the Application was given and interested persons were invited to make representations to the NWB.

After reviewing the submission of the Applicant and considering the representations made by interested persons, the NWB, having given due regard to the facts and circumstances, the merits of the submissions made to it and to the purpose, scope and intent of the *Nunavut Agreement* and of the *Act*, waived the requirement to hold a public hearing, and determined that:

Licence No: 2BE-GRE1621 be renewed as Licence No: 2BE-GRE2126 subject to the terms and conditions contained therein. (Motion #: 2021-B1-014)

Signed this 28th day of SEPTEMBER, 2021 at Gjoa Haven, NU.

Lootie Toomasie,
Nunavut Water Board, Chair

LT/sk/rqd

² Nunavut Planning Commission (NPC) Conformity Determination, dated April 28, 2021.

NUNAVUT WATER BOARD RENEWAL WATER LICENCE

Licence No: 2BE-GRE2126

Pursuant to the *Nunavut Waters and Nunavut Surface Rights Tribunal Act* and the *Agreement Between the Inuit of the Nunavut Settlement Area and Her Majesty the Queen in right of Canada*, the Nunavut Water Board, hereinafter referred to as the Board, hereby grants to

AGNICO EAGLE MINES LIMITED

(Licensee)

145, KING STREET EAST, SUITE 400, TORONTO, ONTARIO M5C 2Y7

(Mailing Address)

hereinafter called the Licensee, the right to alter, divert or otherwise use Water or dispose of Waste for a period subject to restrictions and conditions contained within this Licence:

Licence Number/Type: **2BE-GRE2126 / TYPE "B"**

Water Management Area: **BAKER LAKE WATERSHED (08)**

Location: **GREYHOUND PROJECT, WHITEHILLS LAKE AREA
KIVALLIQ REGION, NUNAVUT**

Classification: **MINING UNDERTAKING**

Purpose: **DIRECT USE OF WATER AND DEPOSIT OF WASTE**

Quantity of Water use not to Exceed: **ONE HUNDRED (100) CUBIC METRES PER DAY**

Effective Date: **OCTOBER 6, 2021**

Expiry of Licence: **OCTOBER 5, 2026**

This Licence renewal issued and recorded at Gjoa Haven, Nunavut, includes and is subject to the annexed conditions.

**Lootie Toomasie,
Nunavut Water Board
Chair**

PART A: SCOPE, DEFINITIONS AND ENFORCEMENT

1. Scope

This Licence allows for the use of Water and the deposit of Waste for a Mining undertaking classified as per Schedule 1 of the *Regulations* at the Greyhound Project, located approximately 50 kilometers north of Baker Lake within the Kivalliq Region, Nunavut.

- a. This Licence is issued subject to the conditions contained herein with respect to the taking of Water and the depositing of Waste of any type in any Waters or in any place under any conditions, where such Waste or any other Waste that results from the deposits of such Waste may enter any Waters. Whenever new Regulations are made or existing *Regulations* are amended by the Governor in Council under the *Nunavut Waters and Nunavut Surface Rights Tribunal Act*, or other statutes imposing more stringent conditions relating to the quantity or type of Waste that may be so deposited or under which any such Waste may be so deposited, this Licence shall be deemed, upon promulgation of such Regulations, to be subject to such requirements; and
- b. Compliance with the terms and conditions of this Licence does not absolve the Licensee from responsibility for compliance with the requirements of all applicable Federal, Territorial and Municipal legislation.

2. Definitions

“Act” means the *Nunavut Waters and Nunavut Surface Rights Tribunal Act*;

“Addendum” means the supplemental text that is added to a full plan or report usually included at the end of the document and is not intended to require a full resubmission of the revised report;

“Amendment” means a change to original terms and conditions of this Licence requiring correction, addition or deletion of specific terms and conditions of the Licence; modifications inconsistent with the terms of the set terms and conditions of the Licence;

“Appurtenant Undertaking” means an undertaking, in relation to which a use of Water or a deposit of Waste is permitted by a licence issued by the Board;

“Board” means the Nunavut Water Board established under the *Nunavut Agreement* and the *Nunavut Waters and Nunavut Surface Rights Tribunal Act*;

“Engineer” means a professional engineer registered to practice in Nunavut in accordance with the *Consolidation of Engineers and Geoscientists Act S. Nu 2008, c.2* and the *Engineering and Geoscience Professions Act S.N.W.T. 2006, c.16 Amended by S.N.W.T. 2009, c.12*;

“High Water Mark” means the usual or average level to which a body of Water rises at its highest point and remains for sufficient time so as to change the characteristics of the land (ref. Department of Fisheries and Oceans Canada, Operational Statement: Mineral Exploration Activities);

“ICP Scan” means the laboratory method for determining trace metals in Water through Emission Spectroscopy using inductively coupled plasma (including from approximately 22 to 32 elements, depending on the laboratory performing the analysis);

“Inspector” means an Inspector designated by the Minister under Section 85 (1) of the *Act*;

“Licensee” means the holder of this Licence;

“Modification” means an alteration to a physical work that introduces a new structure or eliminates an existing structure and does not alter the purpose or function of the work, but does not include an expansion;

“Nunavut Agreement” means the *“Agreement Between the Inuit of the Nunavut Settlement Area and Her Majesty the Queen in right of Canada”*, including its preamble and schedules, and any amendments to that agreement made pursuant to it;

“Regulations” means the *Nunavut Waters Regulations* SOR/2013-69 18th April, 2013;

“Spill Contingency Plan” means a Plan developed to deal with unforeseen petroleum and hazardous materials events that may occur during the operations conducted under the Licence;

“Sump” means an excavation in impermeable soil for the purpose of catching or storing Water or Waste;

“Waste” or “Wastes” means, as defined in S.4 of the *Act*, any substance that, by itself or in combination with other substances found in Water, would have the effect of altering the quality of any Water to which the substance is added to an extent that is detrimental to its use by people or by any animal, fish or plant, or any Water that would have that effect because of the quantity or concentration of the substances contained in it or because it has been treated or changed, by heat or other means.

“Water” or “Waters” means waters as defined in section 4 of the *Act*.

3. Enforcement

- a. Failure to comply with this Licence will be a violation of the *Act*, subjecting the Licensee to the enforcement measures and the penalties provided for in the *Act*;

- b. All inspection and enforcement services regarding this Licence will be provided by Inspectors appointed under the *Act*; and
- c. For the purpose of enforcing this Licence and with respect to the use of Water and deposit or discharge of Waste by the Licensee, Inspectors appointed under the *Act*, hold all powers, privileges and protections that are conferred upon them by the *Act* or by other applicable law.

PART B: GENERAL CONDITIONS

1. The Water use fees for the right to the use of Water shall be paid in accordance with Section 12 of the *Regulations*.
2. The Licensee shall file an Annual Report on the Appurtenant Undertaking with the Board no later than March 31st of the year following the calendar year being reported, containing the following information:
 - a. Summary report of Water use and Waste disposal activities for the reporting period including the following:
 - i. quantity of Water (in cubic metres/year) obtained for all purposes from sources on, in or flowing through Inuit-Owned Lands;
 - ii. quantity of Water (in cubic metres/year) obtained for all purposes from sources on, in or flowing through Crown Lands;
 - iii. quantity of Waste disposed of at on-site Waste disposal facility; and
 - iv. quantity of Waste backhauled to approved facility for disposal;
 - b. List of unauthorized discharges and a summary of follow-up actions taken;
 - c. Any revisions to the Spill Contingency Plan and Abandonment and Restoration Plan, as required by [Part B, Item 7](#), submitted in the form of an Addendum;
 - d. Description of all progressive and/ or final reclamation work undertaken, including photographic records of site conditions before, during and after completion of operations;
 - e. Report all artesian flow occurrences as required under [Part F, Item 3](#);
 - f. Details pertaining to location of sump(s) and drill holes;
 - g. Summary of all information requested and results of the Monitoring Program; and
 - h. Any other details on Water use or Waste disposal requested by the Board by the 1st of November of the year being reported.
3. The Licensee shall notify the NWB of any changes in operating plans or conditions associated with this Project at least thirty (30) days prior to any such change.
4. The Licensee shall install flow meters or other such devices, or implement suitable methods required for the measuring of Water volumes as required under [Part J, Item 1](#).
5. The Licensee shall, for all Plans submitted under this Licence, include a proposed timetable for implementation. Plans submitted, cannot be undertaken without subsequent

written Board approval and direction. The Board may alter or modify a Plan, if necessary to achieve the legislative objectives, and will notify the Licensee in writing of acceptance, rejection or alteration of the Plan.

6. The Licensee shall, for all Plans submitted under this Licence, implement the Plan as approved by the Board in writing.
7. The Licensee shall review the Plans referred to in this Licence, as required by changes in operation and/or technology, and modify the Plan accordingly. Revisions to the Plans shall be submitted in the form of an Addendum to be included with the Annual Report.
8. Every Plan to be carried out pursuant to the terms and conditions of this Licence shall become a part of this Licence, and any additional terms and conditions imposed upon approval of a Plan by the Board become part of this Licence. All terms and conditions of the Licence should be contemplated in the development of a Plan where appropriate.
9. The Licensee shall ensure a copy of this Licence is maintained at the site of operations at all times. Any communication with respect to this Licence shall be made in writing to the attention of:
 - (a) **Manager of Licensing:**
Nunavut Water Board
P.O. Box 119
Gjoa Haven, NU X0B 1J0
Telephone: (867) 360-6338
Fax: (867) 360-6369
Email: licensing@nwb-oen.ca
 - (b) **Inspector Contact:**
Manager of Field Operations, CIRNA
Nunavut District, Nunavut Region
P.O. Box 100
Iqaluit, NU X0A 0H0
Telephone: (867) 975-4284
Fax: (867) 979-6445
10. The Licensee shall submit one electronic copy of all reports, studies, and plans to the Board. Reports or studies submitted to the Board by the Licensee shall include a detailed executive summary in Inuktitut.
11. The Licensee shall ensure that any document(s) or correspondence submitted by the Licensee to the NWB is received and acknowledged by the Manager of Licensing.
12. This Licence is assignable as provided for in Section 44 of the *Act*.

PART C: CONDITIONS APPLYING TO WATER USE

1. Water use for drilling shall be obtained from source(s) proximal to drilling targets, as outlined in the Application, and shall not exceed one hundred (100) cubic metres *per* day.
2. The Licensee shall provide a notice to an Inspector and the Board that includes the coordinates of potential Water sources to be used for the purposes outlined in [Part C, Item 1](#), at least ten (10) days prior to commencement of the exploration program or use of such Water sources.
3. The use of Water from streams or any water bodies not identified in [Part C, Item 1](#) is prohibited unless authorized or approved by the Board in writing.
4. The withdrawal of Water from any stream shall not exceed ten (10) per cent of the low flow of that stream unless approved by the Board in writing.
5. The Licensee shall submit to the Board for approval in writing, at least thirty (30) days prior to the use of Water of a sufficient volume that the source water body may be drawn down, a request for the use of Water containing the following information: volume required, hydrological overview of the water body, details of impacts and proposed mitigation measures.
6. The Licensee shall equip all Water intake hoses with a screen of an appropriate mesh size to ensure that fish are not entrained and shall withdraw Water at a rate such that fish do not become impinged on the screen.
7. The Licensee shall not remove any material from below the ordinary High Water Mark of any water body unless authorized by the Board in writing.
8. The Licensee shall not cause erosion to the banks of any water body and shall provide necessary controls to prevent such erosion.
9. Sediment and erosion control measures shall be implemented prior to and maintained during the undertaking to prevent entry of sediment into Water.

PART D: CONDITIONS APPLYING TO WASTE DISPOSAL

1. The Licensee shall locate areas designated for Waste disposal at a minimum distance of thirty-one (31) metres from the ordinary High Water Mark of any water body such that the quality, quantity or flow of Water is not impaired, unless otherwise approved by the Board in writing.
2. The Licensee shall not practice on-site land filling of domestic Waste, unless otherwise approved by the Board in writing.
3. The Licensee is authorized to dispose of all acceptable food Waste, paper Waste and untreated wood products in an incinerator designed for this purpose.

4. The Licensee shall not open burn plastics, wood treated with preservatives, electric wire, styrofoam, asbestos or painted wood to prevent the deposition of Waste materials of incomplete combustion and/or leachate from contaminated ash residual, from impacting any surrounding Waters, unless otherwise approved by the Board in writing.
5. The Licensee shall provide to the Board, a copy of documented authorization received from the Licensee of the Meadowbank Gold Project prior to backhauling and disposal of any Waste from the Greyhound Project to the Meadowbank Gold Project.
6. The Licensee shall backhaul and dispose of all hazardous Wastes, Waste oil and non-combustible Waste generated through the course of the operation at a licensed Waste disposal site.
7. The Licensee shall maintain records of all Waste backhauled and records of confirmation of proper disposal of backhauled Waste. These records shall be made available to an Inspector or the Board upon request.

PART E: CONDITIONS FOR CAMPS, ACCESS INFRASTRUCTURES AND OPERATIONS

1. No camp activities are authorized under the provisions of this Licence.
2. The Licensee shall not store material on the surface of frozen streams or lakes including the immediate banks except what is for immediate use.
3. The Licensee shall conduct all activities in such a way as to minimize impacts on surface drainage and the Licensee shall immediately undertake corrective measures in the event of any impacts on surface drainage.
4. With respect to access road, pad construction or other earthworks, the deposition of debris or sediment into or onto any water body is prohibited. These materials shall be disposed a distance of at least thirty-one (31) metres from the ordinary High Water Mark in such a fashion that they do not enter the Water.
5. The Licensee shall not mobilize heavy equipment or vehicles for trenching or other activities unless the ground surface is capable of fully supporting the equipment or vehicles without rutting or gouging. Overland travel of equipment or vehicles shall be suspended if rutting occurs.

PART F: CONDITIONS APPLYING TO DRILLING OPERATIONS

1. The Licensee shall not conduct any land based drilling within thirty-one (31) metres of the ordinary High Water Mark of any water body, unless otherwise approved by the Board in writing.

2. The Licensee shall dispose of all drill Waste, including Water, chips, muds and salts (CaCl₂) in any quantity or concentration, from land-based and on-ice drilling, in a properly constructed sump or an appropriate natural depression located at a distance of at least thirty-one (31) metres from the ordinary High Water Mark of any adjacent Water body, where direct flow into a Water body is not possible and no additional impacts are created.
3. If artesian flow is encountered, drill holes shall be immediately sealed and permanently capped to prevent induced contamination of groundwater or salinization of surface Waters. The Licensee shall report all artesian flow occurrences within the Annual Report, including the location (GPS coordinates) and dates.
4. Drilling additives or mud shall not be used in connection with holes drilled through lake ice unless they are re-circulated or contained such that they do not enter the Water, or are demonstrated to be non-toxic.
5. For “on-ice” drilling, where drill additives are not being used, return Water released must be nontoxic and must not result in an increase in total suspended solids in the immediate receiving Waters above the *Canadian Council of Ministers for the Environment, Guidelines for the Protection of Freshwater Aquatic Life* (i.e. 10 mg/L for lakes with background levels under 100 mg/L, or 10% for those above 100 mg/L).
6. The Licensee shall establish water quality conditions prior to and upon completion of any drilling program through lake ice.

PART G: CONDITIONS APPLYING TO MODIFICATIONS

1. The Licensee may, without written consent from the Board, carry out Modifications to the Water supply facilities and Waste disposal facilities provided that such Modifications are consistent with the terms of this Licence and the following requirements are met:
 - a. the Licensee has notified the Board in writing of such proposed Modifications at least sixty (60) days prior to beginning the Modifications;
 - b. such Modifications do not place the Licensee in contravention of the Licence or the *Act*;
 - c. such Modifications are consistent with the NIRB Screening Decision;
 - d. the Board has not, during the sixty (60) days following notification of the proposed Modifications, informed the Licensee that review of the proposal will require more than sixty (60) days; and
 - e. the Board has not rejected the proposed Modifications.
2. Modifications for which all of the conditions referred to in [Part G, Item 1](#) have not been met can be carried out only with written approval from the Board.

3. The Licensee shall provide as-built plans and drawings of the Modifications referred to in this Licence within ninety (90) days of completion of the Modification. These plans and drawings shall be stamped by an Engineer.

PART H: CONDITIONS APPLYING TO SPILL CONTINGENCY PLANNING

1. The Licensee shall implement the Plan entitled “*Agnico Eagle Greyhound and White Hills Exploration Projects Spill Contingency Plan,*” dated July 04, 2019, that was previously approved by the Board.
2. The Licensee shall prevent any chemicals, petroleum products or Wastes associated with the project from entering Water. All sumps and fuel caches shall be located at a distance of at least thirty-one (31) metres from the ordinary High Water Mark of any adjacent water body and inspected on a regular basis.
3. The Licensee shall conduct any equipment maintenance and servicing in designated areas and shall implement special procedures (such as the use of drip pans) to manage motor fluids and other Waste and contain potential spills.
4. If during the term of this Licence, an unauthorized discharge of Waste occurs, or if such a discharge is foreseeable, the Licensee shall:
 - a. Employ the approved Spill Contingency Plan;
 - b. Report the spill immediately to the 24-Hour NWT/NU Spill Line at (867) 920-8130 and to the Inspector at (867) 975-4284; and
 - c. For each spill occurrence, submit to the Inspector, no later than thirty (30) days after initially reporting the event, a detailed report that will include the amount and type of spilled product, the GPS location of the spill, and the measures taken to contain and clean up the spill site.
5. The Licensee shall, in addition to [Part H, Item 4](#), regardless of the quantity of releases of harmful substances, report to the 24-Hour NWT/NU Spill Line, if the release is near or into a water body.

PART I: CONDITIONS APPLYING TO ABANDONMENT AND RESTORATION OR TEMPORARY CLOSING

1. The Licensee shall implement the Plan entitled “*Agnico Eagle Greyhound Exploration Project Conceptual Closure and Reclamation Plan,*” dated July 04, 2019, that was previously approved by the Board.
2. The Licensee shall complete all restoration work prior to the expiry of this Licence.

3. The Licensee shall carry out progressive reclamation of any components of the project no longer required for the Licensee's operations.
4. The Licensee shall backfill and restore all sumps to the pre-existing natural contours of the land.
5. The Licensee shall remove from the site, all infrastructure and site materials, including all fuel caches, drums, barrels, buildings and contents, docks, Water pumps and lines, material and equipment prior to the expiry of this Licence.
6. In order to promote growth of vegetation and the needed microclimate for seed deposition, all disturbed surfaces shall be prepared by ripping, grading, or scarifying the surface to conform to the natural topography.
7. Areas that have been contaminated by hydrocarbons from normal fuel transfer procedures shall be reclaimed to meet objectives as outlined in the *Government of Nunavut's Environmental Guideline for Site Remediation, 2010*. The use of reclaimed soils for the purpose of back fill or general site grading may be carried out only upon consultation and approval by the Government of Nunavut, Department of Environment and an Inspector.
8. The Licensee shall restore all drill holes and disturbed areas to natural conditions immediately upon completion of the drilling. The restoration of drill holes must include the removal of any drill casing materials and if having encountered artesian flow, the capping of holes with a permanent seal. Where drill casings cannot be removed the Licensee shall cut off the casings at ground level and identify with signage.
9. The Licensee may leave the casings on site, if it intends to continue drilling in existing casings, but shall add signaling to keep the area safe for the other territory users. The drill casings left cannot stay on the field for more than 2 years after the drilling.
10. The Licensee may store drill cores produced by the appurtenant undertaking in an appropriate manner and location at least thirty-one (31) metres above the ordinary High Water Mark of any adjacent water body, where any direct flow into a water body is not possible and no additional impacts are created.
11. The Licensee shall contour and stabilize all disturbed areas to reduce erosion and sedimentation to Water upon completion of work at the undertaking and as per [Part I, Item 3](#).

PART J: CONDITIONS APPLYING TO THE MONITORING PROGRAM

1. The Licensee shall measure and record, in cubic metres, the daily quantities of Water utilized for drilling and other purposes.

2. The Licensee shall provide the GPS co-ordinates (in degrees, minutes and seconds of latitude and longitude) of all locations where sources of Water are utilized for all purposes.
3. The Licensee shall determine the GPS co-ordinates (in degrees, minutes and seconds of latitude and longitude) of all locations where Wastes associated with drilling operations are deposited.
4. The Licensee shall obtain representative samples of the Water column below any ice where required under [Part F, Item 5](#) and [Part F, Item 6](#). Monitoring shall include but not be limited to the following:

Total Suspended Solids

pH

Electrical Conductivity,

Total Trace Metals as determined by a standard ICP Scan (to include at a minimum, the following elements: Al, Sb, Ba, Be, Cd, Cr, Co, Cu, Fe, Pb, Li, Mn, Mo, Ni, Se, Sn, Sr, Tl, Ti, U, V, Zn), and

Trace Arsenic and Mercury

5. All sampling, sample preservation and analyses shall be conducted in accordance with methods prescribed in the current edition of *Standard Methods for the Examination of Water and Wastewater*, or by such other methods approved by the Board in writing.
6. All analyses shall be performed in a laboratory accredited according to ISO/IEC Standard 17025. The accreditation shall be current and in good standing.
7. The Licensee shall include in the Annual Report required under [Part B, Item 2](#) all data, monitoring results and information required by this Part.
8. An Inspector may impose additional monitoring requirements.
