Regarding your file # NWB2HAK (NIRB # 04EN012)(INAC # 9545-1-2-HAK-G)

Dear Ms. Phyllis Beaulieu,

This letter is in reply to an earlier letter to NWB from Robert Eno, Regional Water Resources Coordinator – Kitikmeot & Kivalliq Regions dated March 29, 2004.

Sabina Resources intends to assume responsibility for the existing infrastructure and associated debris in the old camp and intends to clean up or use any of the existing diesel fuel or calcium chloride now on site. Debris from the old camp will be either reused, incinerated if appropriate or backhauled for disposal in the Yellowknife dump in the course of the planned exploration program. It is Sabina's intention to examine the existing drum cache and report back to INAC on its condition at the earliest opportunity.

Please find attached the Hackett River Camp Fuel Spill Contingency Plan for review along with a separate Spill Report Form.

If you have any additional questions regarding this submission please call me at (807) 346-2766 or (604) 536 - 2908.

Yours truly,

Harvey Klatt
