130613 2BE-HAK0915 Request for Open Burning EC comments-ILAE.pdf

Mr. Prairie,

Please find the comments provided by Environment Canada for your 2013 open burning request attached for your consideration.

Based on your most recent submission, the request for open burning is being made by Glencore (formerly known as Xtrata Zinc, as alluded to in your submission). From our understanding, Xstrata Zinc was merged with Glencore to form a new company. As our records do not include a formal statement detailing this merger and name change, could you provide confirmation of this change via a letter and/or other pertinent documents that detail the merger (e.g. merger agreement; provide details such as previous and current company name, when the name change occurred, etc.)?

Thank-you for your assistance on this matter and the clarification of the timing of the open burning request.

Regards,

Cory Zyla- d へ b bc

Subject: RE: Open Burning request for 2014 (Hackett River Camp)

Cory,

Thank you for these precisions.

Could you send me the comments from Environment Canada on our 2013 open burning request, we only received KIA and AANDC's comments?

Have a great week-end!

Robert

Subject: Open Burning request for 2014 (Hackett River Camp)

Mr. Prairie,

The Nunavut Water Board (NWB) has received your request for open burning for the Hackett River Camp (File No. 2BE-HAK0915) for 2014 and is currently conducting a preliminary technical review of the request. As you are aware, the NWB may conditionally approve requests for open burning on a case-by-case basis. The NWB would like to take this opportunity to reiterate that approved open burning requests only permit the Licensee to conduct burning-related activities for the duration of a single open burning event (i.e. the Licensee is not permitted to conduct open burning of the specified material on multiple separate occasions over an entire field season). As such, your request for controlled burning of untreated wood waste at the Hackett River Project camp for 2014 does not appear to specify an open burning period that is acceptable to the NWB. Although the NWB recognizes the difficulties associated with predicting a specific period for when open burning will occur at the Hackett River Project camp, the NWB will still require a more specific period of time to process this request (i.e. preferably the exact month for when burning is anticipated, but at minimum the season [e.g. summer, fall]). The NWB would also like to take this opportunity to remind you that comments and concerns have been presented by Aboriginal Affairs and Northern Development Canada, the Kitikmeot Inuit Association, and Environment Canada following the submission of the last open burning request, and that these concerns should be considered prior to the submission of any future request for open burning. Should you seek to conduct additional open burning during 2014 outside of this single-event open burn request, you will be required to submit a separate request for open burning to do so.

The NWB will require clarification on this matter before it can process and finalize the request.

Regards,

Cory Zyla- d へ b bc
