Material Safety Data Sheet

Product Name	ANTIFREEZE	Code W269	
Synonym	Universal Antifreeze, Radiator Antifreeze, Diesel Antifreeze, Petro-Canada Antifreeze-Coolant Petro-Canada Heavy Duty Antifreeze-Coolant, Pre-Mix Antifreeze, Petro-Canada Premium Radiator Antifreeze, Diesel Engine Coolant	Validated on 7/6/2004,	
Manufacturer	PETRO-CANADA P.O Box 2844 Calgary Alberta T2P 3E3	In case of Petro-Canada: Emergency ⁴ 03-296-3000 Canutec Transportation 613-996-6666 Poison Control Centre	
Material Uses	Used as an engine antifreeze coorant	Consult local telephor directory for emergen number(s)	

			_	Exp	osure Limits (ACGIH)	
Name CAS# % (W/W			% (W/W)	TLV-TWA(8 h)	STEL	CEILING
Ethylene glycol Sodium tetraborate pentahydrate (Diesel Engine Coolant only)		107-21-1	≥90 ≤5	Not established 1 mg/m ¹	Not established Not established	100 mg/m ¹ (aerosol) Not established
Manufacturer Recommendation	Not applicable					
Other Exposure Limits	Consult local, state, provincia	al or territory auth	norities for a	cceptable exposure l	mits	

Section 3. Hazards Identification.			
Potential Health Effects	Contact with this product may cause eye irritation. Not expected to cause more than slight skin irritation inhalation of this product may cause respiratory tract irritation. Ingestion may be extremely hazardous May cause teratogenicity/embryotoxicity. May cause damage to reproductive organs. For more information refer to Section 11 of this MSDS.		

Section 4. First	Section 4. First Aid Measures				
Eye Contact	IMMEDIATELY flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek medica attention.				
Skin Contact	Remove contaminated clothing. Isunder before reuse. Wash gently and thoroughly the contaminated skin with running water and non-abrasive soap. Seek medical attention.				
Inhalation	Evacuate the victim to a safe area as soon as possible. If the victim is not breathing, perform artificial respiration. Allow the victim to rest in a well ventilated area. Seek medical attention				
Ingestion	DO NOT induce vomiting because of danger of aspirating liquid into lungs. Seek medical attention				
Note to Physician	Not available				

Flammability	May be combustible at high temperature	Flammable Limits Lower: 3 2%, Upper: 15.3%	
Flash Points	Closed Cup: 116°C (241°F) (Tagliabue) Open Cup: 118°C (241°F) (Cleveland)	Auto-Ignition 413°C (775°F) Temperature	

CONX: DSP

ANTIFREEZE			Page Number: 2
Fire Hazards in Presence of Various Substances	Low fire hazard. This material must be heated before ignition will occur.	Explosion Hazards in Presence of Various Substances	Do not cut, weld, heat, drill or pressurize empty container.
Products of Combustion	Carbon oxides (CO, CO2), smoke and irritating	g vapours as prod	lucts of incomplete combustion
Fire Fighting Media and Instructions	fire, ISOLATE for 800 meters (0.5 mile) in all mile) in all directions. Shut off fuel to fre if it is from area and let fire burn out under controlle venting safety device or any discolouration of to prevent pressure build-up, autoignition or e or CO2. LARGE FIRE use water spray, fog be used, and self-contained breathing appar	I directions, also, s possible to do s d conditions. Wit ank due to fire. O xplosion. SMALL or foam. For sm. atus (SCBA) mai	If tank, rail car or tank truck is involved in a consider initial evacuation for 800 meters (0.5 o without hazard. If this is impossible, withdraw hdraw immediately in case of rising sound from cool containing vessels with water spray in order. FIRE: use DRY chemicals, foam, water spray all outdoor fires, portable fire extinguishers may not be required. For all indoor fires and any dieve protection are required for fire fighting

Section 6. Accidental Release Measures

Material Release or Spill

IN THE EVENT OF A LARGE SPILL CONSIDER THE FOLLOWING CONTROL MEASURES. Consuit current National Emergency Response Guide Book (NAERG) for appropriate spill measures if necessary. Extinguish all ignition sources. Stop leak if safe to do so. Dike spilled material. Use appropriate inert absorbent material to absorb spilled product. Collect used absorbent for later disposal. Ventilate area. Ensure clean-up personnal wear appropriate personal protective equipment. Avoid breathing vapours or mists of material. Avoid contact with spilled material. Avoid contaminating sewers, streams, rivers and other water courses with spilled material. Notify appropriate authorities immediately.

Section 1. I	Handling and Storage
Handling	Avoid contact with any sources of ignition, flames, heat, and sparks. Avoid confined spaces and areas with poor verification. Avoid skin contact. Avoid eye contact. Avoid inhalation of product vapours or mists. Do not inges this product. Wear proper personal protective equipment (See Section 8). Empty containers may contain product residue. Do not pressurize cut heat, or weld empty containers. Do not reuse containers without commercial cleaning and/or reconditioning. Personnel who handle this material should practice good personal hygiene during and after handling to help prevent accidental ingestion of this product. Properly dispose of contaminated leather articles including shoes that cannot be decontaminated.
Storage	Store in dry cool, well-ventilated area. Store away from heat and sources of ignition. Keep container tightly closed. Store away from incompatible and reactive materials (See section 5 and 10).

Engineering	England application appoint until time a net account of the formation appoints appoint a post upon
Engineering Controls	For normal application, special ventilation is not necessary. If user's operations generate vapours or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit. Make-up air should always be supplied to balance air removed by exhaust ventilation. Ensure that eyewash station and safety shower are close to work-slations.
Personal Protection	- The selection of personal protective equipment varies, depending upon conditions of use.
Eyes	Chemical splash goggles should be worn when handling this material.
Body	If this material may come into contact with the body during handling and use, we recommend wearing appropriate protective clothing to prevent contact with the skin. (Contact your PPE provider for more information)
Respiratory	A minimum of NIOSH-approved air-purifying respirator with a organic vapour cartridge or canister may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits. Protection provided by air-purifying respirators is limited. Use a positive-pressure, air-supplied respirator if there is any potential for uncontrolled release, exposure levels are unknown, or any other circumstances where air-purifying respirators may not provide adequate protection.
Hands	If this material may come in contact with the hands during handling and use, we recommend wearing gloves of the following material(s). Neoprene, Polyvinyl chloride (PVC). Consult your PPE provider for breakthrough times and the specific glove that is best for you based on your use patterns.
Feet	Wear appropriate footwear to prevent product from coming in contact with feet and skin

ANTIFREEZE			Page Number: 3	
Section 9. Physical and Chemical Properties				
Physical State and Appearance	Clear viscous liquid	Viscosity	Not available	
Colour	Green	Pour Point	Not available	
Odour	Odourless	Softening Point	Not applicable	
Odour Threshold	Not available	Dropping Point	Not applicable	
Boiling Point	129 to 197°C (264 to 387°F)	Penetration	Not applicable	
Density	1 115 to 1 145 (Water = 1)	Oil / Water Dist. Coefficient	Not available	
Vapour Density	2.1 (Air=1).	Ionicity (in water)	Not available	
Vapour Pressure	0.06 mmHg @ 20°C (68°F)	Dispersion Properties	Not available	
Volatility	0% (w/w)	Solubility	Soluble in water, methanol and diethyl ether	

Section 10. Stability and Reactivity				
Corrosivity	Not available			
Stability	The product is stable	Hazardous Polymerization	Will not occur under normal working conditions	
Incompatible Substances / Conditions to Avoi	Reactive with oxidizing agents, acids, alkalis, perchloric acid, phosphorus, id silvered copper wires carrying DC current, all phatic amines, isocyantes, chlorosulfonic acid and oluem.		May release COx, smoke and irritating vapours when heated to decomposition	

Routes of Entry	Skin contact, eye contact, inhalation and ingestion
Acute Lethality	Ethylene glycol (107-21-1) LD50 4700 mg/kg (oral/rat) LD50 9530 mg/kg (dermal/rabbit).
	Sodium tetraborate pentahydrate (12179-04-3) LD50, 3200-3500 mg/kg (oral/rat) (Boric acid) [Sodium tetraborate pentahydrate]
Chronic or Other Toxic Effect	The contract of the second sec
Dermal Route	Short-term exposure is expected to cause only slight irritation, if any
Inhalation Route	Inhalation of this product may cause respiratory tract imitation
Oral Route	Extremely dangerous in case of ingestion
Eye Irritation/Inflammation	This product contains a component (at >= 1%) that can cause eye irritation. Therefore, this product is considered to be an eye irritant.
Immunotoxicity	Not available
Skin Sensitization	Contact with this product is not expected to cause skin sensitization, based upon the available data and the known hazards of the components
Respiratory Tract Sensitization	Contact with this product is not expected to cause respiratory tract sensitization, based upon the available data and the known hazards of the components.
Mutagenic	This product is not known to contain any components at >= 0.1% that have been shown to cause mutagenicity. Therefore, based upon the available data and the known hazards of the components, this product is not expected to be a mutagen.
Reproductive Toxicity	Borates are possible reproductive toxins based upon available animal ingestion studies in several species. These studies usually involved high doses, over prolonged periods of time. A human study following occupational exposure to borate by inhalation concluded that, no adverse effects to reproduction were found in this population, under the conditions of this study.
Teratogenicity/Embryotoxicity	This product contains a component(s) at >= 0.1% that has been shown to cause teratogenicity and/or embryotoxicity in laboratory tests. Therefore, this product is considered to be a teratogen/embryotoxin (Ethylene glycol).

ANTIFREEZE	Page Number: 4
Carcinogenicity (ACGIH).	ACGIH A4, not classifiable as a human carcinogen (Ethylene glycol). This product is not known to contain any chemicals at reportable quantities that are listed as Group A1, A2, or A3 carcinogens by ACGIH.
Carcinogenicity (IARC).	This product is not known to contain any chemicals at reportable quantities that are listed as Group 1, 2A, or 2B carcinogens by IARC.
Carcinogenicity (NTP)	This product is not known to contain any chemicals at reportable quantities that are listed as carcinogens by NTP.
Carcinogenicity (IRIS):	This product is not known to contain any chemicals at reportable quantities that are listed as carcinogens by IRIS.
Carcinogenicity (OSHA)	This product is not known to contain any chemicals at reportable quantities that are listed as carcinogens by OSHA
Other Considerations	The substance may be toxic to kidneys and liver. Repeated or prolonged exposure to the substance can produce target organs damage. Repeated exposure to a highly toxic material may produce general deterioration of health by an accumulation in one or many human organs.

Environmental Not available Fate	Persistance/ Not available Bioaccumulation Potential	
BOD5 and COD Not available	Products of Not available Biodegradation	

Section 13. Disposal Considerations			
Waste Disposal	Spent/ used/ waste product may meet the requirements of a hazardous waste. Consult your local or regional authorities. Ensure that waste management processes are in compliance with government requirements and local disposal regulations.		

Section 14. Transport Information				
	Not a hazardous material for transport according to the TDG Regulations (Canada)		Not applicable	

Section 15. Reg	ulatory Information				0.000		
Other Regulations	All of the components of this product at DSL, or are exempt from the New Substall components of this formulation are in This product has been classified in acc (CPR) and the MSDS contains all of the			ice Notification (N d on the US EPA lance with the ha	ISN) requirementsTSCA Inventory zard criteria of the	77

Material Safety Data Sheet

WHMIS (Pictograms)	WHMIS (Classification)	Protective Clothing	TDG (pictograms)
	Not controlled	00	Ø

Product Name CHAIN OIL (SUMMED WINTED)		Code	CHAS, 490-431
Product Name CHAIN OIL (SUMMER, WINTER)		C049	CHAW, 490-431
Synonym Not available		Validated on 5/6/2003.	
Manufacturer			Petro-Canada: 403-296-3000 Canutec Transportation: 613-996-6666 Poison Control Centre: Consult local telephone directory for
Material Uses	These products are designed for lubrication of chain saw chains in both high and low ambient temperatures.		emergency number(s),

				Exp	posure Limits (ACGIH)	
	Name	CAS#	% (V/V)	TLV-TWA(8 h)	STEL	CEILING
Mixture of severely hydrotreated and hydrocracked and/or solvent-refined base oil (petroleum) and other proprietary, non-hazardous additives.		Missiure	100	5 mg/m* (oil mist)	10 mg/m² (oil mist)	Not established
Manufacturer Recommendation	Not applicable					
Other Exposure Limits	Consult local, state, provincial or territory authorities for acceptable exposure limits.					

Section 3. Hazards Identification.				
Potential Health Effects	Non imitating to slight transient imitation to skin and eyes, but no permanent damage. Relatively non-toxic via ingestion This product has a low vapour pressure and is not expected to present an inhalation exposure at ambient conditions Upon heating to high temperatures, or mechanical actions which may produce vapours or mists, inhalation of product ma cause irritation of the breathing passages. For more information, refer to Section 11.			

Eye Contact	IMMEDIATELY flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek medical attention.
Skin Contact	Remove contaminated clothing - launder before reuse. Wash gently and thoroughly the contaminated skin with running water and non-abrasive soap. Seek medical attention.
Inhalation	Evacuate the victim to a safe area as soon as possible. If the victim is not breathing, perform artificial respiration. Allow the victim to rest in a well ventilated area. Seek medical attention.
Ingestion	DO NOT induce vomiting because of danger of aspirating liquid into lungs. Seek medical attention.
Note to Physician	Not available

Flammability	May be combustible at high temperature.	Flammable Limits	Not available
Flash Points	OPEN CUP: <u>></u> 168°C (334.4°F) (Cleveland)	Auto-Ignition Temperature	Not available
Fire Hazards in Presence of Various Substances	Low fire hazard. This material must be heated before ignition will occur.	Explosion Hazards in Presence of Various Substances	Do not cut, weld, heat, drill or pressurize empty container. Containers may explode in heat of fire.
Products of Combustion	Carbon oxides (CO, CO2), nitrogen oxides (No compounds (POx), smoke and irritating vapours as

CHAIN OIL (SUMME	L WINTER) Page Number, 2
Fire Fighting Media and Instructions	NAERG96. GUIDE 171. Substances (low to moderate hazard). If tank, rail car or tank truck is involved in a fire, ISOLATI for 800 meters (0.5 mile) in all directions; also, consider initial evacuation for 800 meters (0.5 mile) in all directions. Shu off fuel to fire if it is possible to do so without hazard. If this is impossible, withdraw from area and let fire burn out under controlled conditions. Withdraw immediately in case of rising sound from venting safety device or any discolouration of tank due to fire. Cool containing vessels with water spray in order to prevent pressure build-up, autoignition or explosion SMALL FIRE: use DRY chemicals, foam, water spray or CO2. LARGE FIRE: use water spray, fog or foam. For small outdoor fires, portable fire extinguishers may be used, and self contained breathing apparatus (SCBA) may not be required. For all indoor fires and any significant outdoor fires, SCBA is required. Respiratory and eye protection an required for fire fighting personnel.

Section 6. Accidental Release Measures		
Material Release or Spill	Consult current National Emergency Response Guide Book (NAERG) for appropriate spill measures if necessary Extinguish all ignition sources. Stop leak if safe to do so. Dike spilled material. Use appropriate inert absorbent material to absorb spilled product. Collect used absorbent for later disposal. Avoid contact with spilled material. Avoid contaminating sewers, streams, rivers and other water courses with spilled material. Notify appropriate authorities immediately.	

Section 7. Handling and Storage		
Handling	Avoid contact with any sources of ignition, flames, heat, and sparks. Avoid skin contact. Avoid eye contact. Avoid inhalation of product vapours or mists. Empty containers may contain product residue. Do not pressurize, cut, heat, or weld empty containers. Do not reuse containers without commercial cleaning and/or reconditioning. Personnel who handle this material should practice good personal hygiene during and after handling to help prevent accidental ingestion of this product. Properly dispose of contaminated leather articles including shoes that cannot be decontaminated.	
Storage	Store in dry, cool, well-ventilated area. Keep container tightly closed. Store away from incompatible and reactive materials (See section 5 and 10).	

Engineering Controls	For normal application, special ventilation is not necessary. If user's operations generate vapours or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit. Make-up air should always be supplied to balance air removed by exhaust ventilation. Ensure that eyewash station and safety shower are close to work-station.
	 The selection of personal protective equipment varies, depending upon conditions of use. Eye protection (i.e., safety glasses, safety goggles and/or face shield) should be determined based on conditions of use. I product is used in an application where splashing may occur, the use of safety goggles and/or a face shield should be considered.
Body	Wear appropriate clothing to prevent skin contact. As a minimum long sleeves and trousers should be worn.
Respiratory	Where concentrations in air may exceed the occupational exposure limits given in Section 2 (and those applicable to you area) and where engineering, work practices or other means of exposure reduction are not adequate. NIOSH approved respirators may be necessary to prevent overexposure by inhalation.
Hands	Wear appropriate chemically protective gloves. When handling hot product ensure gloves are heat resistant and insulated.
Feet	Wear appropriate footwear to prevent product from coming in contact with feet and skin.

Section 9. Phys	ical and Chemical Properties		
Physical State and Appearance	Stringy liquid.	Viscosity	CHAS: 155 cSt @ 40°C (104°F), 16.2 cSt @ 100°C (212°F), VI=109 CHAW: 32 @ 40°C (104°F), 6.29 cSt @ 100°C (212°F), VI=151
Colour	Dark red.	Pour Point	CHAS: -21°C (-6°F) CHAW: -42°C (-44°F)
Odour	Slight petroleum oil like.	Softening Point	Not applicable.
Odour Threshold	Not available	Dropping Point	Not applicable.
Boiling Point	Not available	Penetration	Not applicable.
Density	0.831 - 0.88 kg/L @ 15°C (59°F).	Oil / Water Dist, Coefficient	Not available
Vapour Density	Not available	Ionicity (in water)	Not available
Vapour Pressure	Negligible at ambient temperature and pressure.	Dispersion Properties	Not available
Volatility	Non-volatile.	Solubility	Insoluble in water.

CDNX- DSF

Section 10. Stabil	ity and Reactivity		
Corrosivity	Copper corrosion, 3h, 100°C (ASTM D0130); 1a	а	
Stability	The product is stable under normal handling and storage conditions.	Hazardous Polymerization	Will not occur under normal working conditions.
Incompatible Substances / Conditions to Avoid	Reactive with oxidizing agents, reducing agents and acids.	Decomposition Products	May release COx, NOx, SOx, H2S, POx, smoke and irritating vapours when heated to decomposition.

Routes of Entry	Skin contact, eye contact, inhalation and ingestion.	
Acute Lethality	Not available	
Chronic or Other Toxic Effects Dermal Route:	Prolonged or repeated contact may cause skin irritation characterized by dermatitis or oil acne.	
Inhalation Route:	Negligible breathing hazard at normal temperatures (up to 38°C) or recommended blending temperatures. Elevated temperatures or mechanical action may form vapours, mists or furnes, Inhalation of oil mists of vapours from hot oil may cause imitation of the upper respiratory tract.	
Oral Route:	Low toxicity; has laxative effect.	
Eye Irritation/Inflammation:	Repeated or prolonged contact may cause transient irritation, but no permanent damage,	
Immunotoxicity:	Not available	
Skin Sensitization:	This product is not expected to be a skin sensitizer, based on the available data and the known hazards of the components.	
Respiratory Tract Sensitization:	This product is not expected to be a respiratory tract sensitizer, based on the available data and the kno hazards of the components.	
Mutagenic;	This product is not expected to be a mutagen, based on the available data and the known hazards of components.	
Reproductive Toxicity:	This product is not expected to be a reproductive hazard, based on the available data and the known has of the components.	
Teratogenicity/Embryotoxicity:	This product is not expected to be a teratogen or an embryotoxin, based on the available data and the hazards of the components.	
Carcinogenicity (ACGIH):	This product is not known to contain any chemicals at reportable quantities that are listed as A1 or A2 carcinogens by ACGIH.	
Carcinogenicity (IARC):	This product is not known to contain any chemicals at reportable quantities that are listed as group 1, 2A or 2f carcinogens by IARC.	
Carcinogenicity (NTP):	This product is not known to contain any chemicals at reportable quantities that are listed as carcinogens by NTP.	
Carcinogenicity (IRIS):	Not available	
Carcínogenicity (OSHA).	This product is not known to contain any chemicals at reportable quantities that are listed as carcinogens broSHA.	
Other Considerations	No additional remark	

Environmental Not available Fate	Persistance/ Not available Bioaccumulation Potential	
BOD5 and COD Not available	Products of Not available Biodegradation	

Section 13. Disposal Considerations		
Waste Disposal	Spent/ used/ waste product may meet the requirements of a hazardous waste. Consult your local or regional authorities Ensure that waste management processes are in compliance with government requirements and local disposa regulations.

MARINE GAS OIL

MDO - MARINE DIESEL OIL 3 CST (CLEAR)

Application and Use: Multi-purpose fuel

Product Description:

A complex mixture of aliphatic, olefinic, naphthenic and aromatic hydrocarbons.

REGULATORY CLASSIFICATION

Class B, Division 3: Combustible Liquids.

Class D, Division 2, Subdivision B: Toxic Material

CEPA: CANADIAN ENVIRONMENTAL PROTECTION ACT

All components of this product are either on the Domestic

Substances List (DSL) or are exempt.

TDG INFORMATION (RAIL/ROAD):

Shipping Name: FUEL OIL Class:

Packing Group: III PIN Number: UN1202

Marine Pollutant: N

Please be aware that other regulations may apply.

TELEPHONE NUMBERS MANUFACTURER/SUPPLIER:

Emergency 24 hr. (519) 339-2145 IMPERIAL OIL

Technical Info. (800) 268-3183 Products Division

111 St Clair Avenue West

Toronto, Ontario M5W 1K3

(416) 968-4441

2. REGULATED COMPONENTS

The following components are defined in accordance with sub-paragraph 13(a) (i) to (iv) or paragraph 14(a) of the Hazardous Products Act:

> NAME CAS #

Fuel Oil No.2 >99.9 V/V 68476-30-2

3 TYPICAL PHYSICAL & CHEMICAL PROPERTIES

Physical State: Liquid

0.900 at 15.5 deg C

Specific gravity: 0.820 to 0.900 Viscosity: 1.30 cSt at 40 deg C

to 11.00 cSt at 40 deg C

Vapour Density: 4 Boiling Point: 150 to 370 deg C Evaporation rate: <1 (1= n-butylacetate)

Solubility in water: negligible Freezing/Pour Point: -4 deg C -39 (RANGE)

Odour Threshold: not available Vapour Pressure: 4 kPa at 38 deg C

Appearance/odour: White or pale yellow liquid, petroleum odour

4. HEALTH HAZARD INFORMATION

NATURE OF HAZARD

INHALATION:

Negligible hazard at normal temperatures (up to 38 deg C). High vapour concentrations are irritating to the eyes, nose, throat and lungs; may cause headaches and dizziness; may be anesthetic and may cause other central nervous system effects.

Avoid breathing vapours or mists.

EYE CONTACT:

Slightly irritating, but will not injure eye tissue.

SKIN CONTACT:

Low toxicity. Irritating.

INGESTION:

Low toxicity.

Small amounts of this liquid drawn into the lungs from swallowing or vomiting may cause severe health effects (e.g. bronchopneumonia or pulmonary edema).

CHRONIC:

Lifetime skin painting tests indicate that materials of similar composition have produced skin cancer in experimental animals. The relationship of these results to humans has not been fully established.

ACUTE TOXICITY DATA:

Based on animal testing data from similar materials and products, the acute toxicity of this product is expected to be:

Oral : LD50 > 5000 mg/kg (Rat)
Dermal : LD50 > 2000 mg/kg (Rabbit)
Inhalation : LC50 > 2500 mg/m3 (Rat)

OCCUPATIONAL EXPOSURE LIMIT:

Manufacturer Recommends: 100 ppm based on composition.

Local regulated limits may vary

5. FIRST AID MEASURES

INHALATION:

In emergency situations use proper respiratory protection to immediately remove the affected victim from exposure. Administer artificial respiration if breathing has stopped. Keep at rest. Call for prompt medical attention.

EYE CONTACT:

Flush eyes with large amounts of water until irritation subsides. If irritation persists, get medical attention.

CONY, DSE

SKIN CONTACT:

Immediately flush with large amounts of water. Use soap if available. Remove contaminated clothing, including shoes, after flushing has begun. If irritation persists, seek medical attention.

INGESTION:

DO NOT induce vomiting since it is important that no amount of the material should enter the lungs (aspiration). Keep at rest. Get prompt medical attention.

6. PREVENTIVE AND CORRECTIVE MEASURES

PERSONAL PROTECTION:

The selection of personal protective equipment varies, depending upon conditions of use.

In open systems where contact is likely, wear safety goggles, chemical-resistant overalls, and chemically impervious gloves.
Where only incidental contact is likely, wear safety goggles, long sleeves, and chemical-resistant gloves.

Where concentrations in air may exceed the occupational exposure limits given in Section 4 and where engineering, work practices or other means of exposure reduction are not adequate, approved respirators may be necessary to prevent overexposure by inhalation.

ENGINEERING CONTROLS:

The use of local exhaust ventilation is recommended to control emissions near the source. Laboratory samples should be handled in a fumehood. Provide mechanical ventilation of confined spaces.

HANDLING, STORAGE AND SHIPPING:

Keep containers closed. Handle and open containers with care. Store in a cool, well ventilated place away from incompatible materials. In keeping with good personal hygiene practices, wash hands thoroughly after handling the material.

Do not handle or store near an open flame, sources of heat, or sources of ignition.

Material will accumulate static charges which may cause a spark. Static charge build-up could become an ignition source. Use proper relaxation and grounding procedures.

Empty containers may contain product residue. Do not pressurize cut, heat, or weld empty containers. Do not reuse empty containers without commercial cleaning or reconditioning.

LAND SPILL:

Eliminate source of ignition. Keep public away. Prevent additional discharge of material, if possible to do so without hazard. Prevent spills from entering sewers, watercourses or low areas. Contain spilled liquid with sand or earth. Do not use combustible materials such as sawdust.

Recover by pumping (use an explosion proof motor or hand pump), or by using a suitable absorbent.

Consult an expert on disposal of recovered material. Ensure disposal in compliance with government requirements and ensure conformity to local disposal regulations. Notify the appropriate authorities immediately. Take all additional action necessary to prevent and remedy the adverse effects of the spill

WATER SPILL:

Remove from surface by skimming or with suitable absorbents. If allowed by local authorities and environmental agencies, sinking and/or suitable dispersants may be used in unconfined waters.

Consult an expert on disposal of recovered material. Ensure disposal in compliance with government requirements and ensure conformity to local disposal regulations. Notify the appropriate authorities immediately. Take all additional action necessary to prevent and remedy the adverse effects of the spill.

7. FIRE AND EXPLOSION HAZARD

Flashpoint and method: >40 deg C PMC1 ASTM D93

Autoignition: NA Flammable Limits: LEL: 0.7% UEL: ...

GENERAL HAZARDS:

Combustible Liquid; may form combustible mixtures at or above the flash point.

Toxic gases will form upon combustion.

Static Discharge; material may accumulate static charges which may cause a fire.

FIRE FIGHTING:

Use water spray to cool fire exposed surfaces and to protect personnel. Shut off fuel to fire.

Use foam, dry chemical or water spray to extinguish fire. Respiratory and eye protection required for fire fighting personnel. Avoid spraying water directly into storage containers due to danger of boilover.

A self-contained breathing apparatus (SCBA) should be used for all indoor fires and any significant outdoor fires. For small outdoor fires, which may easily be extinguished with a portable fire extinguisher, use of an SCBA may not be required.

HAZARDOUS COMBUSTION PRODUCTS:

Smoke, carbon monoxide, carbon dioxide and traces of oxides of sulphur

8. REACTIVITY DATA

STABILITY:

This product is stable. Hazardous polymerization will not occur.

INCOMPATIBLE MATERIALS AND CONDITIONS TO AVOID:

Strong oxidizing agents

HAZARDOUS DECOMPOSITION:

none

9. NOTES

All components of this product are listed on the U.S. TSCA inventory.

10. PREPARATION

Prepared by:

Date Prepared: November 06, 2002 Lubricants & Specialties

CAUTION: " The information contained herein relates only to this product or material and may not be valid when used in combination with any other product or material or in any process. If the product is not to be used for a purpose or under conditions which are normal or reasonably foreseeable, this information cannot be relied upon as complete or applicable. For greater certainty, uses other than those described in Section 1 must be reviewed with the supplier. The information contained herein is based on the information available at the indicated date of preparation. This MSDS is for the use of Imperial Oil customers and their employees and agents only. Any further distribution of this MSDS by Imperial Oil customers is prohibited without the written consent of Imperial Oil."

Material Safety Data Sheet

WHMIS (Pictograms)	WHMIS (Classification)	Protective Clothing	TDG (pictograms)
	B-3, D-2B		4

Product Name	DIESEL FUEL	Code	W104, W293 SAP: 120, 121, 122, 287		
Synonym	Diesel 50, Diesel 50 LS, #1 Diesel , #1 Diesel LS, Diesel LC, Seasonal Diesel,		Validated on 2/6/2004.		
	Seasonal Diesel LS, Diesel AA, Domestic Marine Diesel, International marine Diesel, Seasonal Diesel Locomotive, Domestic Marine diesel LS, diesel -20°C (LS), LSD, Low Sulphur Diesel, dyed diesel, marked diesel, coloured diesel, Naval Distillate, Ultra Low Sulphur Diesel, ULS Diesel, Mining Diesel, Mining Diesel, Furnace Oil, Stove Oil.				
Manufacturer	PETRO-CANADA P.O. Box 2844 Calgary, Alberta T2P 3E3	In case of Emergency	Petro-Canada: 403-296-3000 Canutec Transportation: 613-996-6666 Poison Control Centre: Consult local telephone directory for		
Material Uses	Diesel fuels are distillate fuels suitable for use in high and medium speed internal combustion engines of the compression ignition type. Mining Diesel has a higher flash point requirement, for safe use in underground mines.		emergency number(s).		

				Exposure Links (AC GP)		
	Name	CAS#	% (WV)	TLV-TWA(8 h)	STEL	CEILING
1) Diesel oil.		68334-30-5	>99.9	100 mg/m² (as total hydrocarbons) *	Not established	Not established
2) Proprietary additives.		Not available	<0.1	Not established	Not established	Not established
Arematic content is 50 Sulphur content is 0-0.	% maximum (benzene; nil). 50%.					
Manufacturer Recommendation	*Avoid prolonged or repeated skin contact to diesel fuels which can lead to demail imitation and may be associated van increased risk of skin cancer.					
Other Exposure Limits	Consult local, state, provincial or territory authorities for acceptable exposure limits,					

Section 3. Haza	rds Identification.
Potential Health Effects	Combustible liquid. Exercise caution when handling this material. Contact with this product may cause skin and ey irritation. Prolonged or repeated contact may cause skin irritation, defatting, drying and dematitis. Inhalation of the product may cause respiratory tract irritation and Central Nervous System (CNS) Depression, symptoms of which minclude; weakness, dizziness, sturred speech, drowsiness, unconsciousness and in cases of severe overexposure; com and death. Ingestion of this product may cause gastro-intestinal irritation. Aspiration of this product may result in sever irritation or burns to the respiratory tract. For more information refer to Section 11 of this MSDS.

Section 4. First A	lid Measures
Eye Contact	IMMEDIATELY flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek medical attention.
Skin Contact	Remove contaminated clothing - launder before reuse. Wash gently and thoroughly the contaminated skin with running water and non-abrasive soap. Seek medical attention.
Inhalation	Evacuate the victim to a safe area as soon as possible. If the victim is not breathing, perform artificial respiration. Allow the victim to rest in a well ventilated area. Seek medical attention.
Ingestion	DO NOT induce vomiting because of danger of aspirating liquid into lungs. Seek reedical attention.
Note to Physician	Not available

Section 5. Fire	fighting Measures		
Flammability	Class II - combustible liquid (NFPA).	Flammable Limits	LOWER: 0.7%, UPPER: 6% (NFPA)
Flash Points	Diesel Fuel: Closed Cup: >40°C (>104°F) Marine Diesel Fuel: Closed Cup: >60°C (>140°F) Mining Diesel: Closed Cup: 52°C (126°F)	Auto-Ignition Temperature	225°C (437°F)
Fire Hazards in Presence of Various Substances		Explosion Hazards in Presence of Various Substances	Containers may explode in heat of fire. Do no cut, welld, heat, drill or pressurize empty container. Vapour explosion hazard indoors outdoors or in sewers. Runoff to sewer may create fire or explosion hazard.
Products of Combustion	Carbon oxides (CO, CO2), nitrogen oxides (NOx), smoke and imitating vapours as products of incomp See Section 11 (Other Considerations) for informat	olete combustion.	
Fire Fighting Media and Instructions	NAERG96, GUIDE 128. Flammable liquids (Non-pic CAUTION: This product has a moderate flash point if tank, rail car or tank truck is involved in a fire, I evacuation for 800 meters (1/2 mile) in all direction SMALL FIRES: Dry chemical, CO2, water spray or LARGE FIRES: Water spray, tog or regular loam, do it without risk. Fires Involving Tanks or Car/Trailer Loads: Fight mozzles. Cool containers with flooding quantities of water u from venting devices or any discolouration of tan unmanned hose holders or monitor nozzles; if the pressure self-contained breathing apparatus (SC protection.	t above 40°C: Use of v SOLATE for 800 metes. regular foath. Do not use straight st fire from maximum dis until well after fire is on k. ALWAYS stay awans is in possible with	reater spray when fighting fire may be inefficient, ers (1/2 mile) in all directions; also consider initial greams. Move containers from his area if you can stance or use unmanned hose holders or monitor ut. Withdraw immediately in case of rising soun- ary from the ends of tanks. For massive fire, us- draw from area and let fire burn. Wear positive

Section 6. Accid	iental Release Measures
Material Release or Spill	Consult current National Emergency Response Guide Book (NAERG) for appropriate spill measures if necessary. IN THE EVENT OF A LARGE SPILL CONSIDER THE FOLLOWING CONTROL MEASURES: Extinguish all ignition sources. Stop leak if safe to do so. Ventilate area. Dike spilled material. Use appropriate invert absorbent material to absorb spilled product. Collect used absorbent for later disposal. Avoid contact with spilled material. Avoid breathing vapours or mists of material. Avoid contaminating sewers, streams, rivers and other water courses with spilled material. Evacuate non-essential personnel. Ensure clean-up personnel wear appropriate personal protective equipment. Ground and bond all equipment used to clean up the spilled material, as it may be a static accumulator. Notify appropriate authorities immediately.

Handling	COMBUSTIBLE MATERIAL. Handle with care. Avoid contact with any sources of ignition, flames, heat, and sparks Avoid skin contact. Avoid eye contact. Avoid inhalation of product vapours or mists. Empty containers may contain product residue. Do not pressurize, cut. heat, or weld empty containers. Do not reuse containers without commercial cleaning and/or reconditioning. Personnel who handle this material should practice good personal hygiene during and after handling to help prevent accidental ingestion of this product. Properly dispose of contaminated leather articles including shoes that cannot be decontaminated. Avoid confined spaces and areas with poor ventilation. Ensure all equipment is grounded/bonded. Wear proper personal protective equipment (See Section 8).
Storage	Store away from heat and sources of ignition. Store in dry, cool, well-ventilated area. Store away from incompatible and reactive materials (See section 5 and 10). Ensure the storage containers are grounded/bonded.

Engineering Controls	For normal application, special ventilation is not necessary. If user's operations generate vapours or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit. Make-up air should always be supplied to balance air removed by exhaust ventilation. Ensure that eyewash station and safety shower are close to work-station.
	The selection of personal protective equipment varies, depending upon conditions of use. Eye protection (i.e., safety glasses, safety goggles and/or face shield) should be determined based on conditions of use. I product is used in an application where splashing may occur, the use of safety goggles and/or a face shield should be considered.
Body	Wear appropriate clothing to prevent skin contact. As a minimum long sleeves and trousers should be worn.
Respiratory	Where concentrations in air may exceed the occupational exposure limits given in Section 2 (and those applicable to you area) and where engineering, work practices or other means of exposure reduction are not adequate, NIOSH approved respirators may be necessary to prevent overexposure by inhalation.
Hands	Wear appropriate chemically protective gloves. When handling hot product ensure gloves are heat resistant and insulated.
Feet	Wear appropriate footwear to prevent product from coming in contact with feet and skin.
