

July 22, 2006

Dear Sir or Madam:

**Re: High Lake Project, Summary of 2006 Field Work Plans**

As part of the consultation process for the High Lake Project, Wolfdan Resources Inc. ("Wolfdan") is committed to providing information about our baseline data collection programs to governments, communities, Inuit organizations and other interested parties. In keeping with this commitment, please find enclosed the following document: *High Lake Project, Summary of 2006 Field Work Plans*.

The High Lake Project consists of the High Lake mine site, the Grays Bay dock, and the all-season road and temporary winter road between the mine site and the dock (Figure 1). Wolfdan recently made the decision to remove the Ulu property and the High Lake-Ulu winter road from the project. The design of field programs reflects this recent change.

We would appreciate the opportunity to address any questions, concerns or comments that you may have regarding the enclosed work plan summary. Wolfdan values such comments as your feedback can help us better plan and adapt our program as required.

Comments or questions can be forwarded to myself or Glenda Fratton, according to the contact information below. We look forward to hearing from you.

Yours very truly,  
WOLFDAN RESOURCES INC.

Andrew Mitchell, P.Geo.
