Hi Don,

I can confirm that we do not intend to intersect any streams with the proposed tundra strip.

Water use at the High Lake camp typically averages about 1.8m<sup>3</sup> to 5.0 m<sup>3</sup> per day. I would expect similar water usage at the MolyMag Camp. The water source at the High Lake camp is High Lake itself. The water source at the proposed MolyMag camp would be the James River.

In terms of drilling, water use is estimated to be 25 m<sup>3</sup> per day, per drill. Our application requests the use of 2 drills, for a water use total from drilling of approximately 50 m<sup>3</sup> per day.

From these estimates, I would expect water use from all activities to be within the 100 m<sup>3</sup> per day requested.

Regards,

Jason

Hi Jason,

Could you confirm by email what we have discussed over the phone today about the tundra airstrip not intersecting any streams etc. Also, the wording for Part C, Item 1 of the Licence currently specifies 100 cubic metres per day of water for all uses. Ideally any amendment will specify total water daily use for each camp and their sources as well as total water for drilling purposes. Can you confirm water use requested for the High Lake Camp, MolyMag Camp and total for drilling purposes? Thanks.

Good Afternoon Jason,

After taking a brief look at the application and comments received, could you provide any additional information on the proposed tundra strip, for example will it be crossing any streams and require a water diversion etc. I will try to review this application in the next few business days however due to a number of applications currently on the go I cannot make any guarantees.

Assuming there is no long delay with additional information requirements, the file should go to the Board for a decision next week. I expect a decision by late next week or shortly after the Easter long weekend. Please note this is a very compact schedule and typically much more time would be required.

I'll keep you updated if anything else is required for the application.

Don

Good afternoon – the 30 day review was just completed on Friday, March 19, 2010 and the file is now with the Technical Advisor to prepare the licence for Board approval. I have cc'd Don on this email for his response as to a timeline for an approval.

Regards,

Hi Phyllis,

I was wondering if you could tell me when we can expect a decision on this proposed amendment. The reason I ask is that the decision will determine what materials we mobilize into High Lake at the beginning of April. We have received an approved permit for the camp from the KIA, but we are waiting for the decision on this amendment before finalizing our plans.

Thank you,

Jason

Please see attached letter and notices requesting review of the above project located within the Kitikmeot Region. The deadline for comments is March 19, 2010

All application documents are available on our ftp site at the following link: username *public* and password *registry*

<ftp://nunavutwaterboard.org/1%20PRUC/2%20MINING%20AND%20MILLING/2B/2BE%20-%20Exploration/2BE-HIG0712%20MMG/1%20APPLICATION/2010%20Amendment%203/>

All organizations with a bulletin board are respectfully requested to post the attached notices for a period of 30 days.

Please note that an NPC conformity is not required for this project and NIRB extended their commenting period to February 8, 2010. No licence amendment will be issued until such time as NIRB has completed their screening and the NWB has been notified.
