NUNAVUT IMALIRIYIN KATIMAYINGI
NUNAVUT WATER BOARD
OFFICE DES EAUX DU NUNAVUT

needs to have company contact information, person in charge of the project/senior management,

seasonal closure needs to address discovery, cleanup and disposal of contaminated soils (not just mention that they will look for it)..

needs proper maps, showing the location of the site, infrastructure, topographical is preferred.

they mention disposal at an "approved" municipal facility, the licence will have to address that in an authorization letter... which could be referred to in the A&R.
