

Executive Summary
Application for Amendment No. 5 of Water Licence No. 2BE HOP0712

Hope Bay Mining Ltd. is moving Windy Camp and associated facilities (including fuel tanks originally installed at Patch Lake) to Quarry D. This was partially done to address concerns expressed over the years by INAC and KIA that the existing Windy Camp was too close to Windy Lake. HBML has discussed the use of quarry D as a camp location with the KIA Lands Department and they agree that this is a good choice. HBML proposes to use the waste water treatment plant approved by the NWB in 2009 for use at Boston Camp. This facility will replace the facility originally described to the Nunavut Water Board in the 2007 Water Licence Application for 2BE-HOP0712.
