Re: NWB File No: NWB2HOP

I have reviewed the application for amendment submitted by Cambiex Exploration Inc. for Windy Camp and offer the following comment.

There was no mention in the documentation that I received as to how far the final discharge of effluent will be from the camp and the nearest body of water. The General Sanitation Regulations made under authority of the Public Health Act require a setback distance of at least 30 metres. If this distance can be respected then this office has no objections to the amendment.

Should you have any questions regarding this matter, please do not hesitate to contact me at (867) 983-7345.

Robert Phillips, CPHI(C)
Environmental Health Officer
