NEWS RELEASE 00-21

MAENF-OTC Bulletin Board

Miramar Reports Second Quarter 2000 Results - Continued Successes from Northern Strategy -

VANCOUVER — Miramar Mining Corporation today announced its results for the second quarter of 2000. During the three-month period ending June 30, 2000, Miramar reported a consolidated cash flow from operations before changes in working capital of \$1.5 million, versus negative \$5.6 million for the same period in 1999.

During the second quarter, Miramar reported a consolidated loss of \$1,299,000 or \$0.02 per share, versus a loss of \$5,057,000 or \$0.09 per share for the same period in 1999. These results include the consolidated losses in Northern Orion Explorations Ltd. At June 30, 2000, the Company has consolidated working capital of \$26.9 million. The reduction in working capital since March 31, 2000 is a result of investment in Miramar's Northern Platform - primarily increased capital investment related to the increased production at the Con and Giant Mines (\$500,000), exploration at the Con (\$300,000), continued funding of exploration activities at the Hope Bay Joint Venture (\$762,500) and funding of Northern Orion (\$700,000). Capital expenditures at the Con and Giant Mines will diminish significantly for the balance of the year, following completion of the majority of the capital programs during the third quarter.

In the second quarter, Miramar realized an average selling price of US\$289 per ounce of gold which compares favourably to the average spot price of US\$280 for the quarter. Miramar's hedge position at June 30, 2000 was as follows:

Total			MUNAVUT WATER BO	
Instrument	Ounces	Price		
Spot deferred gold sales contract	17,500	US\$286	AUC Do coo	
Gold calls sold (July/August 2000)	10,000	US\$303	AUG 2 9 2000	
Gold puts held	18,000	US\$270		
Gold calls sold (July/02-June/03)	36,000	US\$285	PUBLIC REGISTR	

"During the second quarter we continued the process of building on the successes of our Northern Platform," said Tony Walsh, Miramar's President and CEO. "The Hope Bay project generated considerable excitement following the results from the drilling of the Boston deposit and the discovery and definition of the high grade Hinge Zone, Central Vein and Stringer Zone at the Doris deposit. Results have exceeded our expectations for this exciting project. Further, having the Giant Mining operations supplementing the Con Mine in Yellowknife is delivering results and we now expect our Yellowknife operations to generate free cash flow for the remainder of the life of mine at current gold prices," he said. Second quarter production totaled 30,060 oz at a cash cost of US\$269 per ounce of gold.

For further information on operating results for the second quarter 2000 please see news release MAE 00-20 dated August 21, 2000 on our website at <a href="http://www.miramarmining.com/">http://www.miramarmining.com/</a>

This News Release contains farward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 concerning the financial results of the Company, operating results, cash flows and capital expenditures at the Con and Glant Mines. Statements concerning the identification of high grade deposits at Hope Bay may also be deemed to be forward looking statements in that they may be deemed to be predictions of the mineralization that would be encountered if the project is actually mined. These forward-looking statements are subject to a variety of risks and uncertainties which could cause actual events or results to differ materially from those reflected in the forward-looking statement including, without limitation, uncertainties involved in recovery rates; accidents, equipment breakdowns, labour disputes or other unanticipated difficulties with or interruptions in production, and variations in one grade; risks and uncertainties relating to fluctuating precious and base metals prices; the possibility of unexpected costs and expenses relating to environmental issues, uncertainties relating to the need for government approvals and the cooperation of government agencies in regards to any environmental liabilities and other risks and uncertainties, including those described in the Company's Annual Report on Form 20-F for the year ended December 31, 1999 and Reports on Form 6-K filed with the Securitles and Exchange Commission.

Certain forward-looking statements in this report are indicated with a "."

#### Notes to the Financial Statements:

Effective January 1, 2000, the Canadian Institute of Chartered Accountants ("CICA") changed accounting standards relating to the accounting for income taxes and employee future benefits.

#### 1. Post Retirement Benefits

For employee future benefits, the cost of retirement and certain post employment benefits will be recognized over the period in which employees render services to the Company. This is consistent with the recognition of pension benefits earned by employees. These additional benefits (which have traditionally been recorded as paid) were determined and accrued as a deferred long-term liability.

Miramar has adopted this new recommendation on a retroactive basis and has restated the prior periods financial statements.

### 2. Future Income Taxes

The CICA's new standard on accounting for income taxes adopts the liability method of accounting for future income taxes, which is based upon differences in the timing of reporting income and expenses in financial statements and tax returns. Under the new rules for future income taxes, the Company is required to record future income taxes as if all assets and liabilities on the balance sheet were settled at their carrying amounts, net of valuation allowance, at current tax rates.

This accounting change has been applied retroactively, without restatement of prior periods. As a result, the Company has recorded an increase to deficit of \$4,040,000, a decrease to non-controlling interest of \$3,333,000 and a future tax liability of \$7,373,000 as at January 1, 2000.

This adjustment reflects the difference between the book value and the tax basis of certain assets held by Northern Orion. This provision does not impact Miramar's cash taxes payable nor does it impact its significant pool of non-capital loss carry-forwards in Canada.
