DSD cannot comment on this request for amendment of a water license at this time, as the application provided lacks sufficient information to adequately assess the environmental effects.

Information lacking:

- Mapping is not adequate to determine the entire drainage course;
- No information on drainage gradients and expected routes of flow;
- No information given on the volume of material to be deposited;
- No information on the amount and type of vegetation available to assist in the bioremediation of the sewage sludge; and
- Lack of information on sampling procedures and locations for monitoring, including information on the timing and frequency of sampling.

Do you have any suggestions or recommendations for this application?

Do you support the project proposal? YES ☐ NO ☐
Any additional comments?
