RE: 2BE-HOP2232 Notification of Discharge from Facilities Quarry D

As per Part D, Item 15 of the Type B Water License 2BE-HOP2232, Agnico Eagle Mines Ltd. (Agnico) is providing written notification to the Inspector prior to the anticipated discharge of accumulated water from Quarry D containment area located at the Hope Bay Project Doris Advanced Exploration site.

Table 1. Facility Estimated Discharge Volumes and Locations

SNP Monitoring Station	Estimated Discharge Volume (m ³)	Discharge Point (UTM NAD 83)
Quarry D	10,000	13W 0432823 7551708

Water will only be discharged to the tundra upon receipt of analytical results that comply with the water quality criteria outlined within Part D of the water license. Effluent that does not meet the discharge criteria limits under Part D will be directed to the Doris-Madrid Tailings Impoundment Area as per Part F, Item 18. (c).

For effluent that exceeds the discharge criteria for Total Suspended Solids, the effluent will be used for dust suppression on site roads when all other parameters are below the discharge criteria. Discharge volumes and analytical results for each monitoring station will be provided in the monthly monitoring reports.

If you have any questions or require clarification on any of the information provided, please contact me.

Regards,

Brett Fairbairn
Environmental Coordinator – Hope Bay
Agnico Eagle Mines Limited
