| <b>N</b> Action, if any, taken or proposed to contain, recover, clean up or dispose of product(s) and contaminated materials<br>Remediation has already begun and will be ongoing for as long as necessary. Fuel on snow has been shovelled up and burned - pools of hydrocarbon have been removed with sorbants and these have been burned.                                                                                                                                     |  |                                                                           |  |                                                                                                                 |  |                                                                                                                     |  |
| <b>O</b> Do you require assistance?<br><input type="checkbox"/> no <input checked="" type="checkbox"/> yes, describe:                                                                                                                                                                                                                                                                                                                                                            |  |                                                                           |  | <b>P</b> Possible hazards to persons, property, or environment; eg: fire, drinking water, fish or wildlife<br>- |  |                                                                                                                     |  |
| <b>Q</b> Comments and/or recommendations<br>As the snow melts we are anticipating more fuel spillage to become apparent and are monitoring this site very closely. Some of the spills are just becoming evident. It appears that there are several small spills over a large area; It is somewhat difficult to estimate amounts, but fortunately the snow has acted as a natural sorbent and has aided greatly in our cleaning efforts. This clean up will be certainly ongoing. |  |                                                                           |  |                                                                                                                 |  |                                                                                                                     |  |
