| x Yes □ No |
| List and attach plans and drawings or project proposal. Identify proposed changes. See attached Project Description, Appendix D. A project Summary is also attached in English, Inuktitut and Inuinnaqtun, in Appendix E. |
| Establishment of a temporary camp at Hood River has been approved in the past, but is not currently within the scope of the licence. The current licence relies on an adjacent camp facility at the Ulu property (2BM-ULU1520). As the facility at Ulu is currently unavailable for use by Blue Star, Blue Star would like to establish our own temporary camp to support execution of the currently |

| licenced activities. Accordingly, an amendment is needed to include domestic use, additional waste deposit and increase in water volume used. |
|---|
| 10. OPTIONS |
| Does the proposed amendment change any of the alternative methods and locations that were considered to carry out the project? |
| x Yes □ No |
| Provide a brief explanation of the alternative methods or locations that were considered to carry out the project. Identify proposed changes. |
| Construction and use of a temporary camp at Hood River has been permitted in the past, and has occurred historically, but not under the current licence. |
| Alternatives to the project as currently scoped have been considered and involve use of regional accommodations in lieu of constructing a new camp, use of the existing facilities at Ulu, and a no-go decision for the project. |
| Using regional accommodations may occur for short durations while a camp is not operational at Hood River, however, this is not viewed as a sustainable solution over the longer term given the distance to nearby communities and facilities, and the related cost and increase in traffic involved in transiting this distance on a frequent basis. |
| Discussion with the Ulu land owner and property owner indicate that the Ulu camp is not currently available for use for exploration crews as space is limited and reclamation is currently ongoing on site. |
| A no-go decision is not in the interests of Blue Star shareholders, and would limit future opportunities for Nunavummiut. Accordingly, none of these are favorable alternatives. |
| 11. CLASSIFICATION OF PRIMARY UNDERTAKING |
