I have attached two documents filed with the TSX and available through SEDAR confirming the completion of the merger of HTX and Transition Metals.

We will continue to operate under the name of the wholly owned subsidiary HTX Minerals and would like the licence issued under that name.

Thank you for your help.

tom

Good afternoon Thomas, the tech advisor assigned to the file advises that the draft licence is in the final stages of being completed. He will have the file prepared for our Board tomorrow with a deadline of Thursday and barring any issues, you should have your licence on Friday of this week.

If there has been a merger of HTX Minerals and Transition Metals Corp., could you please provide our office with the merger docs. Will the licence still be issued to HTX Minerals Corp?

Following the merger of HTX Minerals Corp and Transition Metals Corp., I have been going through our records to ensure that we have the proper permitting for our projects. So I am wondering if you could confirm a couple of points on our permits for Itchen Lake.

Our records indicate that there is an outstanding application for a permit, and I have been through the documents contained on your ftp site. We have most of this information in our files but it is unclear of the status of this application.

I am wondering about the status of our application and what the next steps may be?

thank you

tom
