To: AANDC Water Resources Officer Eva Paul

Dear Eva,

We have installed the liners at the fuel transfer station in front of the fuel bowzers and in the work shop. Below are some pictures of the installation. All fuel transfers to slip tanks out at the drummed fuel berms are now being done inside a fuel berm.

Photo 1: Area excavated for liner.

Photo 2: Liner before being buried.

Photo 3: Liner buried and corners marked for locating.

Photo 4: Shop floor being excavated for liner installation.

Photo 5: Shop being excavated for liner installation.

Photo 6: Liner before being backfilled.

Photo 7: Shop liner being back filled.

**Regards, Greg Duso**
