Hi Assol,

Thanks for the prompt preliminary technical review and for reaching out for clarification. At present, the Project is in a period of extended care and maintenance, with only site inspections and necessary site maintenance activities being conducted annually. No drilling has taken place since 2012. Upon the resumption of drilling activity, MMG will ensure that all future drill sites are closed following removal of each drill rig. MMG intends to address any historical drill sites still needing closure prior to closure of the Project water licence and/or the final closure of exploration tenements (whichever comes first). Additional information can be found in the Closure and Reclamation Plan provided with our application.

Our application contained an Inuktitut translation per the Izok Water Licence 2BE-IZO1823, Part B, Item 10. Although there is no Inuinnaqtun translation requirement for this specific Licence, MMG recognizes that Inuinnaqtun is the more appropriate language for this area of Nunavut and can commission an additional translation in the coming weeks. We would also be happy to support a replacement of the 'Inuktitut translation requirement' in our licence with an 'Inuinnaqtun translation requirement' in the next Licence issuance, given the Izok Project's West Kitikmeot location.

Please let me know if you have any further questions.

Sincerely,

Sarah

Subject: Fwd: Application to renew and amend Water Licence 2BE-IZO1823 for MMG Resources Inc.

Hello Sarah,

Thank you for submitting the application to renew water licence No: 2BE-IZO1823. We've completed the preliminary technical review and would like to request the submission of the timeline for removal of drill collars/anchors as required in Part B, Item 2(e) of the licence.

In addition, could you please provide the project summary translated into Inuinnaqtun?

Best regards,

Assol
