

WATER LICENCE # 2BE-KAZ0609 AMENDMENT SUMMARY
FOR
PACIFIC RIDGE EXPLORATION LTD.

Pacific Ridge Exploration Ltd. submitted an amendment to its current water license # 2BE-KAZ0609 Nov 8, 2006. The reasons for the amendments concern an update to our water requirements for diamond drilling and camp usage as well as to extend our licensing period. These changes do not trigger any changes to the supplemental information already given with respect to our original submission.

The amount of water required is greater than initially estimated because the size of the drill being used in 2007 is larger. Also initial estimates of water usage at the camp and drill is thought to be somewhat low. By increasing our total usage from 21.5m³ to < 100 m³/day the daily total water used for the total project will still be within the allowable amount for Type "B" classification.

The expiry date of the license has been requested to be changed to reflect more closely the time frame of the summer work programs which can extend well into Oct. The change requested is from Sept 15, 2009 to Nov. 1, 2009.
