Dear Mr. Norman,

Thanks for the e-mail. I already drafted the licence and will send it out for board approval. There are a few changes, including the change of [the water use amount and licence expiry date](#) as you requested, and disposal of waste [in a NWB approved waste disposal site](#).

I checked out the licence status of the Hamlet of Baker Lake and found out the landfill in the Hamlet is unlicensed. Based on the amendment licence being issued, it is illegal to dispose of waste in the Hamlet of Baker Lake. It is advised that you contact INAC about this matter.

Best regards,

Zhong Liu

Dear Mr. Zhong Liu;

Please see attached our documents confirming our permission to utilize the Baker Lake Land Fill site for our 2007 field season garbage disposal for non-hazardous waste. With respect to used oil or old batteries, I have contacted Baker Lake Contracting who has a permitted facility in Baker Lake to dispose of used oil and accepts the oil free of charge. They also accept used batteries for a nominal fee.

Pacific Ridge Exploration Ltd. will be able to dispose of all of its waste products in an environmentally responsible manner and I trust the attached documentation is sufficient to satisfy our water licensing requirements.

Yours truly;

George Norman
Exploration Manager
