Richard Dwyer
Licensing Administer
Nunavut Water Board
PO Box 119
Gjoa Haven NU X0B 1J0

Dear Mr. Dwyer,

RE: Water Licence Amendment

Aurora Energy Resources Inc. (Aurora) would like to request an amendment to water licence 2BE-KAZ0609. We request that the license be amended to allow open burning of untreated wood products under Part D Item 2. There will be no mineral exploration, the only the activity will be to reclamation the Bissett Lake Camp.

Aurora would also like an extension to the expiry date to allow us adequate time to carry out the Final Closure and Reclamation Plan. We plan to conduct the reclamation program before the 2010 winter season begins. However, we would like to add contingency time to the request just in case things do not go as planned and we need extra time. We request the expiry to be September 19, 2011.

To help support this amendment request I have attached our Final Closure and Reclamation Plan. This plan includes the following documents as appendices:

- 2009 status report ,
- Environmental Protection Procedures (updated),
- Uranium Exploration Procedures (updated),
- Field Emergency Response Plan (updated),
- Spill Contingency Plan (updated), and
- Wildlife Monitoring & Mitigation Plan (updated).

Please do not hesitate to contact me at any time at the address below.

Regards,

John
