Subject: 091021 2BE-KIG0812 Amendment Application Status
Date: Wednesday, October 21, 2009 12:45:00 PM

Good afternoon Caren – please be advised that due to internet server problems within our organization we are unable to start the process on this file at this time as we do not have access to our Central system. Staff and our IT people are in the process of resolving this situation. In the meantime I will print off what has been submitted to date and have Don Carr, our technical advisor, review the submissions and notify you directly on any technical documents required to complete the application.

Since this application is a change to your project, namely the request for drilling on ice which is not currently authorized, this application will require a conformity review by NPC and a screening decision from NIRB (File No. 06AN085). May I suggest that you forward your application to both NPC and NIRB and provide our office with their determinations. Both of these determinations are required prior to issue of any amendment.

Phyllis Beaulieu
