Hi Richard,

I see that he answered the second question. My revised comments are as follows:

*"DFO is unable to assess the impacts to fish and fish habitat based on the information provided. To fully determine the impacts of this project on nearby aquatic species, we would require the following information:*

- *GPS coordinates for the sites of water taking*
- *Information on the fish species and aquatic environment where the water is being taken*
- *Total volume and/or instantaneous flow measurements for the waterbodies/watercourses from which the water will be taken"*

Thank you,

Michael

Hi Michael,

This was sent to the [DFO fisheriesprotection@dfo-mpo.gc.ca](mailto:DFO_fisheriesprotection@dfo-mpo.gc.ca) from the applicant about 7 hours ago did you get a chance to review it?

Regards,

Richard
