All -

After another successful exploration season, we have officially closed camp as of Thursday September 4, 2014. Over the course of approximately three months, we have completed our geophysical program and a drilling program totalling 11,161 meters in 45 drill holes. We look forward to next year, and as always feel free to contact myself or John Robbins at [John.Robbins@areva.ca](mailto:John.Robbins@areva.ca); (306) 343-4513 with any questions or comments.

Regards,

**Naomi Stumborg**

SHEQ Supervisor, Exploration

KIA Licence #: KVL306C02

Good morning,

We are preparing to commence the 2014 Kiggavik field season on June 9, 2014. In addition to the detail provided with the annual report, I would like to provide a more definitive summary of the upcoming exploration activities. Ground gravity geophysical surveys will be conducted on the Bong South East, Pizza-End North and West of Moon Lake areas as indicated in the attached maps. There will be a total of 137 km of ground gravity, magnetics and VLF-EM. Moreover, other areas (85W-Sleek Lake, Roughland, Caribou, Caribou West, Bong SE, Granite/Bong, Ed2) will be covered by a total of 400 km of magnetics and VLF-EM. The drilling activities will be similar to previous years with the use of three drilling rigs for approximately 11,500 m (~ 40 drill holes). The proposed drilling and geophysics locations are presented in the attached figures.

Activities will be conducted in accordance with the management plans provided and the licences and permits indicated above. If you have any questions or comments, please don't hesitate to contact myself or John Robbins at [John.Robbins@areva.ca](mailto:John.Robbins@areva.ca) or (306) 343-4513.

Regards,

**Naomi Stumborg**
