Gentleman:

Re: Wildlife Mitigation and Monitoring Plan for the Kiggavik 2008 Field Program

AREVA Resources Canada Inc. would like to inform you that we are currently revising our Wildlife Mitigation and Monitoring Plan for the 2008 season. This document is further to the revision that was submitted with the Annual Report on Jan 31, 2008. AREVA has contracted Goodings Environmental Inc. to conduct our wildlife field studies. Due to this change in contract, AREVA and Goodings will be adopting new methods of wildlife monitoring and data collection. We will be working with government organizations and special interest groups to help devise a plan that will meet the needs of these groups and AREVA. We appreciated your patience in this matter and a final revised plan will be distributed once completed.

Yours truly,

A handwritten signature in blue ink, appearing to read 'Mark Warbanski', with a long horizontal flourish extending to the right.
