Mr. Joe Murdock
Director of Technical Services
Nunavut Water Board
P.O. Box 119
Gjoa Haven, NU X0B 1J0

Dear Mr. Murdock:

Re: Application For Water License – Revised Figure 2

Attached Figure 2 Revision 3 – Regional Location for our Water License application submitted on November 9, 2006. This revision includes the addition of caribou water crossings provided to us by KIA and modifies the northwest and northeast project boundaries to avoid these sensitive areas.

We would like to point out ground based activities such as drilling, ground geophysics, and prospecting will be limited to our leases and claims. Flights for airborne activities will occur in the expanded boundary area and will be scheduled with wildlife protection, particularly caribou protection, in mind.

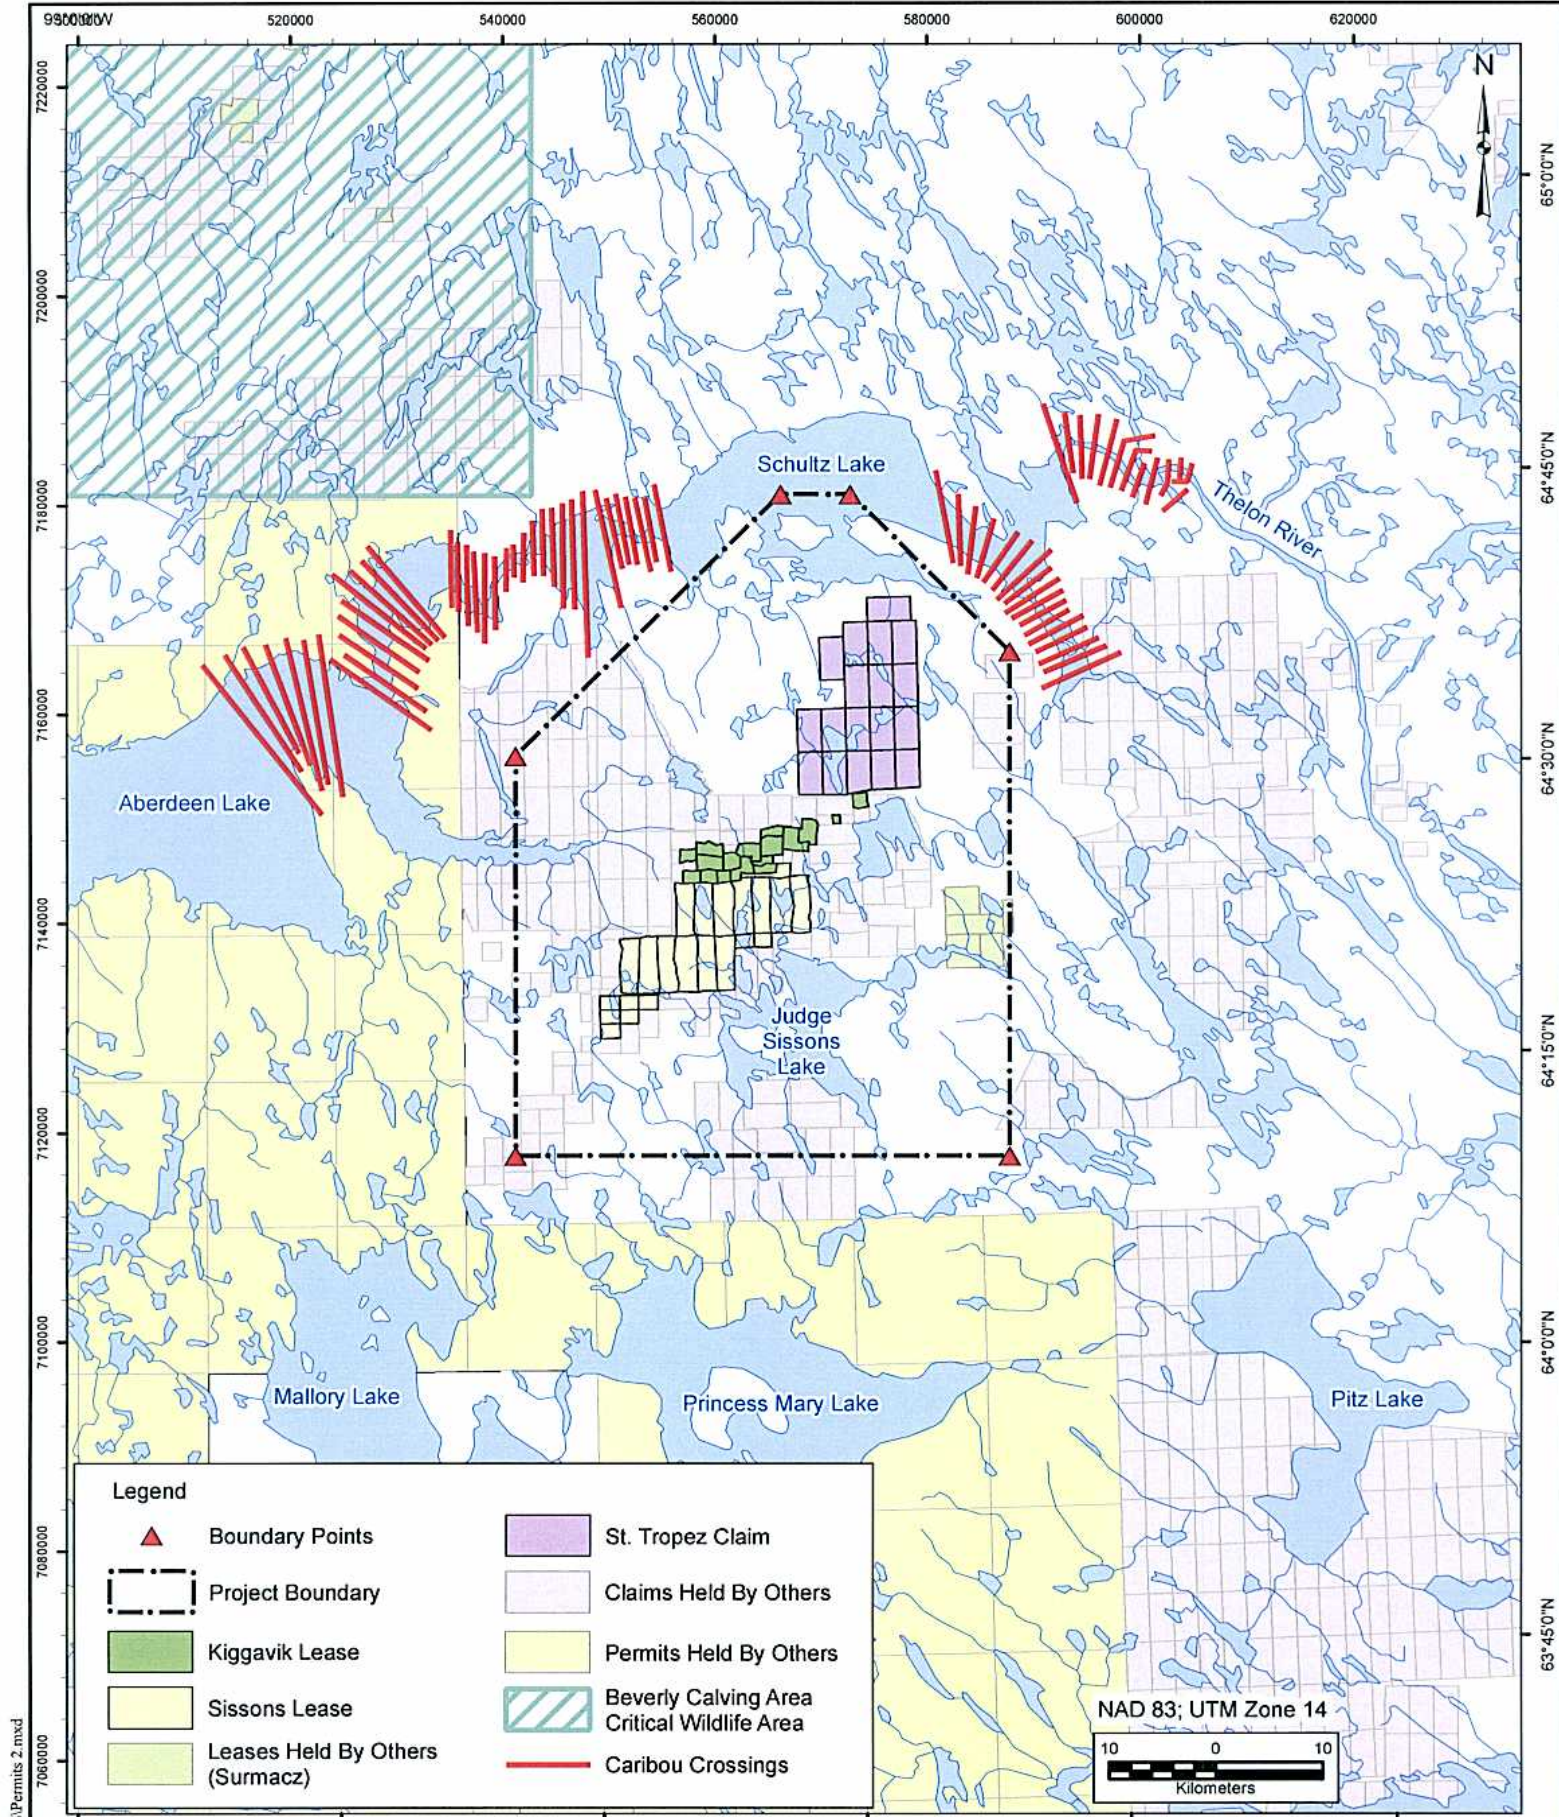

Please update your file with the revised drawing.

Yours truly,

A handwritten signature in blue ink, appearing to read 'Barry McCallum', is written over a light blue horizontal line.

Barry McCallum
