**RE: Water License 2BE-KIG0812 Inspection**

Mr. Guerin,

I am currently engaged in the planning and development of the inspection schedule for the 2012 field season.

While it is too early to predict the exact date, I will be attending the site to conduct inspections on the water use and disposal, waste management and other related water license issues. I do hope to be in Baker Lake Area and conducting inspections starting on or about the 25th of July with your inspection scheduled for the 29th of July 2012.

When I get to your site I expect we will be on the ground for 1 hour and I am seeking your assistance in preparing for the inspection. If possible I would like to know the following information;

- Updated company contact information; updated info for yourself / other head office contact and current project or site manager.
- Names and positions of staff on site(s) at this time
- Confirmation of exact coordinates (degrees/min/sec, NAD 83) for your camp location, air strip/landing location and locations of main activities based out of the camp (i.e.: recent drilling locations, fuel caching).
- Land use permit (LUP) numbers which are associated with this particular water license.
- Any other information you feel is pertinent for a site visit (i.e.: camp location has changed from previous seasons, site hazards or restrictions, site safety protocols, etc.).
- Are there any outstanding documents or documents recently submitted to the Nunavut Water Board (i.e.: within the last 60 days)?

This information will allow us the opportunity to review the terms and conditions of your current license with yourself or your staff and note any issues that can be

addressed cooperatively and brought forward to the Nunavut Water Board, Government of Nunavut or back to Aboriginal Affairs Canada.

Additionally, if you could provide me a short summary of the work scheduled for around this time period it would be greatly appreciated

Also attached is a copy of your 2011 inspection report, this report should be kept on site and made available to all staff for review. As specified under the Act (Nunavut Water and Nunavut Surface Right Tribunal Act), a submission is required once received and any concern or questions regarding the report may be addressed prior to my inspection, to resolve any outstanding issues.

I am looking forward to our correspondence and hope we have the opportunity to work cooperatively together this coming year.

Sincerely,

*Sent by E-mail*
