Good morning,

We mobilized to Kiggavik camp to begin the 2015 Kiggavik field season on June 11, 2015. In addition to the detail provided with the annual report, I would like to provide a more definitive summary of the upcoming exploration activities. Ground gravity geophysical surveys will be conducted on the locations described by the black outlined polygons and labelled as 1, 2a, 2b, 3, 4 and 5 as indicated on the attached map. There will be a total of 126.7 km of ground gravity coverage on the Kiggavik property. Additionally there will be 77.3 km of gravity coverage on the Gendarme grid and magnetics and VLF-EM coverage of 167.1 km on the Gendarme and West of Loon Lake grids on the St. Tropez property (attached map). The drilling activities will occur on two projects, at Kiggavik approximately 27 holes will be drilled for an estimate of 8, 000 metres. There will be a drilling program at St. Tropez as well consisting of 4 holes for a total of 1, 200 metres. The proposed drilling and geophysics locations are presented in the attached figures.

Activities will be conducted in accordance with the management plans provided and the licences and permits indicated above. If you have any questions or comments, please don't hesitate to contact myself or John Robbins at John.Robbins@areva.ca or (306) 343-4513.

Regards,

Stephanie Forseille, PAg
