

## **ADDENDUM No. 1**

### **Spill Contingency Plan**

#### **Kiggavik Project**

**May 30, 2008**

1. Section 3.1 Petroleum and Chemical Product Storage and Inventory

Addition of a list of products used and stored on site and a commitment to generate and regularly update a inventory list including quantities.

Note that EH&S Group is determining if the handling, storage and/or transportation of products from and at the Kiggavik Project meet the prerequisites necessitating registration with the Government of Nunavut-Department of Environment as a waste generator and for use of waste manifests.

2. Section 3.1.1 Drums

Addition of a description and photo's of secondary containment utilized at the Kiggavik Project for the storage of fuel drums and other hazardous products and waste dangerous goods.

3. Section 3.1.2 Fuel Tanks

Updated to indicate that the bulk storage tanks for fuel will not be utilized during the 2008 field season as a result of lack of available bulk fuel.

The use of timbers for increased bearing area, when the EnviroTanks are installed was approved by the local Fire Marshal, Tim Hinds, via email correspondence.

4. Section 3.3 Location and Content of Spill Kits

Include photo of spill kits utilized at the Kiggavik Project.

5. Section 4.3 Winter Fuel Hauling

Additions made to the spill response equipment list.

6. Section 5 Spill Reporting Requirements

Updated to indicate the personnel responsible for initiating the Spill Contingency Plan.

7. Section 5.1 Spill Response Contact List

Updates made to the contact list, to reflect comments made by reviewers and changes in internal personnel.

#### 8. Section 5.2 Reporting Requirements

Additions and updates made to the required information to collect and report.
