**RE: DRILLING UPDATE: KIKERK (KIKKIKTALIK) AND ROCKINGHORSE
(KOAMAOGAKTOK) PROGRAMMES**

nwB2KIK0002

- 1) KIKERK: The Kikerk (Kikkiktalik) exploration drill programme is scheduled to start Saturday, 27 May, with a move from the Rockinghorse (Koamaogaktok) property located 90km southeast; drilling will commence either on 28 or 29 May. Tentatively, four holes are planned into three anomalies located east of Monopros claim KL 12, on the Tree 1 claim held by Rhonda Mining Corp., with whom Monopros has an agreement in place. (See accompanying TABLE and location map). Order of drilling is yet to be established.

nwB2ROC0002

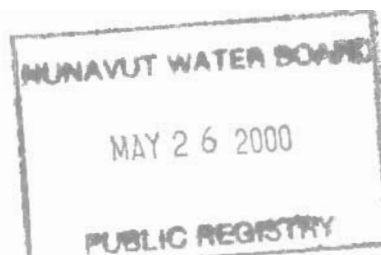

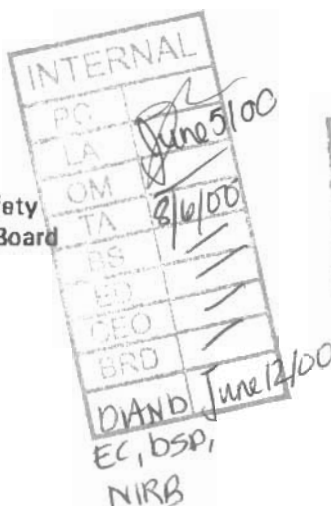

- 2) ROCKINGHORSE: Drilling on the last hole, #RHL-00-17c, was completed today. An estimated 2511m of small-diameter core was recovered, with #RHL-0014c intersecting kimberlite; a second hole (#RHL-00-15c) was drilled to delineate contacts. On 15 May, a group of elders from Kugluktuk visited the camp at Muskox Lake and received updated maps of the drill programme; the camp met with their approval. The camp now is being shut down and secured; the Kikerk programme will be served out of Kugluktuk, where the project manager, geologist and drill crew will be based.

Further information, including final statistics and summary maps, will be provided at the termination of both programmes. Thank you for the opportunity to provide the foregoing.

Regards,

-- ssp
