FUELS, FUEL ADDITIVES, OIL

Knife Lake Project – Spring 2004 Drill Programme

Product Name	DIESEL FUEL	Code	W104 SAP: 120, 121, 122, 287
Synonym	Diesel 50, Diesel 50 LS, #1 Diesel , #1 Diesel LS, Diesel LC, Seasonal Diesel,	Validated o	n 3/2/2001.
	Seasonal Diesel LS, Diesel AA, Domestic Marine Diesel, International marine Diesel, Seasonal Diesel Locomotive, Domestic Marine diesel LS, diesel -20°C (LS), LSD, Low Sulphur Diesel, dyad diesel, marked diesel, coloured diesel, Naval Distillate, Ultra Low Sulphur Diesel, ULS Diesel.	1	
Manufacturer	PETRO-CANADA P.O. Box 2844 Calgary, Alberta T2P 3E3	In case of Emergency	Petro-Canada: 403-296-3000 Canutec Transportation: 613-996-6666 Poison Control Centre: Consult local telephone directory for
Material Uses	Diesel fuels are distillate fuels sultable for use in high and medium speed internal combustion engines of the compression ignition type.		emergency humber(s).

			Exposure Limits (ACGIH)			
	Name	CAS#	% (VIV)	TLV-TWA(8 h)	STEL	CEILING
Diesel oil,     Proprietary additives.		88334-30-5 Not available	>99.9	100 mg/m³ (as total hydrocarbons) * Not established	Not established Not established	Not established Not established
Aromatic content is 50	% maximum (banzene: nil).					
Manufacturer Recommendation	<ul> <li>Avoid prolonged or repeated skin contact to diesel fuels which an increased risk of akin cancer.</li> </ul>			ch can lead to dermal	Irritation and may b	pe associated wi
Other Exposure Limits	Consult local, state, provincial or territory authorities for acceptable exposure limits.					

Section 3. Hazards Identification.				
Potential Health Effects	Eye contact may cause mild eye Irritation. Skin contact can cause moderate to severe irritation and produce drying, cracking, or defatting dermatitis. Inhalation of vapours can cause CNS depression with symptoms of nausea, headaches, vomiting, dizziness, fatigue, light-headedness, reduced coordination, unconcloueness and possibly death. Inhalation can also cause irritation of nose and throat. Aspiration of liquid drops into the lungs may produce potentially fatal chemical pneumonitis (fluid in the lungs), severe lung damage, or respiratory failure. For more information, refer to Section 11.			

Section 4. First	Aid Measures
Eye Contact	IMMEDIATELY flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek medical attention.
Skin Contact	Remove contaminated clothing - launder before reuse. Wash gently and thoroughly the contaminated akin with running water and non-abrasive soap. Seek medical attention.
Inhalation	Evacuate the victim to a safe area as soon as possible. If the victim is not breathing, parform artificial respiration. Allow the victim to rest in a well ventilated area. Seek medical attention.
Ingestion	DO NOT induce vomiting because of danger of aspirating liquid into lungs. Seek medical attention.
Note to Physician	Not available

Flammablilty	Class II - combustible liquid (NFPA),	Flammable Limits	LOWER: 0.7%, UPPER: 6%
Flash Points	Diesel Fuel: Closed Cup: >40°C (>104°F) Marine Diesel Fuel: Closed Cup: >60°C (>140°F)	Auto-Ignition Temperature	225°C (437°F)
Fire Hazards In Presence of Various Substances	Flammable in presence of open flames, sparks, or heat. Vapours are heavier than air and may travel considerable distance to sources of ignition and flash back. This product can accumulate static charge and ignite. May accumulate in confined spaces.	Hazards in Presence of Various	Containers may explode in heat of fire. Do not cut, weld, heat, drill or pressurize empty container. Vapour explosion hazard indoors, outdoors or in sewers. Runoff to sewer may create fire or explosion hazard.

DIESEL FUEL	Page Number: 2
Products of Combustion	Carbon oxides (CO, CO2), nitrogen oxides (NOx), sulphur oxides (SOx), sulphur compounds (H2S), water vapour (H2O), smoke and irritating vapours as products of incomplete combustion.
Fire Fighting Media and Instructions	NAERG96, GUIDE 128, Flammable Ilquids (Non-polar/Water-Immiscible).  CAUTION: This product has a moderate flash point above 40°C; Use of water spray when fighting fire may be inefficient.  If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also consider initial evacuation for 800 meters (1/2 mile) in all directions.  SMALL FIRES: Dry chemical, CO2, water spray or regular foam.  LARGE FIRES: Water spray, fog or regular foam. Do not use straight streams. Move containers from fire area if you can do it without risk.
	Fires involving Tanks or Car/Trailer Loads: Fight fire from maximum distance or use unmanned hose holders or monitor nozzles.  Cool containers with flooding quantities of water until well after fire is out. Withdraw immediately in case of rising sound from venting devices or any discolouration of tank. ALWAYS stay away from the ends of tanks. For massive fire, use unmanned hose holders or monitor nozzles; if this is impossible withdraw from area and let fire burn. Wear positive pressure self-contained breathing apparatus (SCBA). Structural firefighters' protective ciothing will only provide limited protection.

Section 6. Accidental Release Measures				
Material Release or Spill	NAERG96, GUIDE 128, Flammable Liquids (Non-polar/ Water-immiscible).  ELIMINATE ALL IGNITION SOURCES. Avoid contact. Stop leak if without risk, Contain spill. Absorb with inert absorbents, dry clay, or diatomaceous earth. Avoid inhaling dust of diatomaceous earth for it may contain silica in very fine particle size, making this a potential respiratory hazard. Place used absorbent in closed metal containers for later disposal or burn absorbent in a suitable combustion chamber. DO NOT FLUSH TO SEWERS, STREAMS OR OTHER BODIES OF WATER. Check with applicable jurisdiction for specific disposal requirements of spilled material and empty containers. Notify the appropriate authorities immediately.			

	andling and Storage
Handling	Keep away from heaf. Keep away from sources of ignition. Empty containers pose a fire risk. DO NOT rause empty containers without commercial cleaning or reconditioning. Ground/bond line and equipment during pumping or transfer to avoid accumulation of static charge. DO NOT ingest. Do not breathe gas/vapour/spray. In case of insufficient ventilation wear suitable respiratory equipment. If ingested, seek medical advice immediately. Avoid contact with skin and eyes Practice good personal hyglene. Wash hands after handling and before eating. Launder work clothes frequently, Discard saturated leather goods.
Storage	Store in tightly closed containers in cool, dry, isolated, well-ventilated area, and away from incompatibles. Ground at equipment containing material.

Engineering Controls	For normal application, special ventilation is not necessary. If user's operations generate vapours or mist, use ventilation to keep exposure to alroome contaminants below the exposure limit. Make-up air should always be supplied to balance air removed by exhaust ventilation. Ensure that eyewash station and safety shower are close to work-station.
Personal Protection Eyes	The selection of personal protective equipment varies, depending upon conditions of use.  Eye protection (i.e., safety glasses, safety goggles and/or face shield) should be determined based on conditions of use. product is used in an application where splashing may occur, the use of safety goggles and/or a face shield should be considered.
Body	Wear appropriate clothing to prevent skin contact. As a minimum long sleeves and trousers should be worn.
Respiratory	Where concentrations in air may exceed the occupational exposure limits given in Section 2 (and those applicable to you area) and where engineering, work practices or other means of exposure reduction are not adequate, NIOSH approver respirators may be necessary to prevent overexposure by inhalation.
Hands	Wear appropriate chemically protective gloves. When handling hot product ensure gloves are heat resistant and insulated.
Feet	Wear appropriate footwear to prevent product from coming in contact with feet and akin.

Appearance		Viscosity	1.3-4.1 cSt @ 40°C (104°F)
Colour	Clear to yellow / brown. Low sulphur diesel fuels (<0.05 wt % sulphur) are colouriess to light yellow (and may be dyed red for taxation purposes). Regular aulphur diesel fuels (0.05-0.50 % sulphur) may be colouriess to yellow / brown and are usually dyed red for taxation purposes.	Pour Paint	Variable, 0°C to -50°C (32°F to -58°F)
Odour	Petroleum oil like.	Softening Point	Not applicable.
Odour Threshold	Not available	<b>Dropping Point</b>	Not applicable.

DIESEL FUEL	Page Number: 3		
<b>Bolling Point</b>	150-371°C (302-700°F)	Penetration	Not applicable.
Density	0.85 kg/L @ 15°C (Water = 1).	Oil / Water Dist. Coefficient	Not available
Vapour Density	4.5 (Air = 1)	Ionicity (in water)	Not applicable.
Vapour Pressure	1.0 kPa @ 20°C (7.5 mmHg @ 68°F).	Dispersion Properties	Not available
Volatility	<0.1 (Butyl acetate = 1), less than gasoline.	Solubility	Insoluble in cold water, soluble in non-polar hydrocarbon solvents,

Section 10. Stability and Reactivity				
Corrosivity Not available				
Stability	The product is stable under normal handling and storage conditions.	Hazardous Polymerization	Will not occur under normal working conditions.	
Incompatible Substances / Conditions to Avoid	Reactive with oxidizing agents and acids.	Decomposition Products	May release COx, NOx, SOx, H2S, H2O, smoke and irritating vapours when heated to decomposition.	

Section 11. Toxicological In	formation
Routes of Entry	Skin contact, eye contact, inhalation, and ingestion,
Acute Lethality	Acuts oral toxicity (LD50): 7500 mg/kg (rat).
Chronic or Other Toxic Effects Dermal Route:	Skin contact may cause moderate to severe irritation. Repeated exposure would produce drying and cracking or defatting dermatitis. (See Other Considerations)
Inhalation Route:	Inhalation of vapours can cause CNS depression with symptoms of nauses, headaches, vomiting, dizziness, fatigue, light-headedness, reduced coordination, unconclousness and possibly death. Inhalation can also cause irritation of nose and throat.
Oral Route:	Aspiration of liquid drops into the lungs may produce potentially fatal chemical pneumonitis (fluid in the lungs), severe lung damage, or respiratory failure.
Eye Irritation/Inflammation:	Eye contact may cause mild irritation, but no permanent damage.
Immunotoxicity:	Not available
Skin Sensitization:	This product is not expected to be a skin sensitizer, based on the available data and the known hazards of the components.
Respiratory Tract Sensitization:	This product is not expected to be a respiratory tract sensitizer, based on the available data and the known hazards of the components.
Mutagenic:	This product is not expected to be a mutagen, based on the available data and the known hazards of the components.
Reproductive Toxicity:	This product is not expected to be a reproductive hazard, based on the available data and the known hazards of the components.
Teratogenicity/Embryotoxicity:	This product is not expected to be a teratogen or an embryotoxin, based on the available data and the known hazards of the components.
Carcinogenicity (ACGIH):	ACGIH A3: animal carcinogen. [Diesel oll] (See Other Considerations)
Carcinogenicity (IARC):	This product is not known to contain any chemicals at reportable quantities that are listed as group 1, 2A or 2B carcinogens by IARC.
Carcinogenicity (NTP):	This product is not known to contain any chemicals at reportable quantities that are listed as carcinogens by NTP.
Carcinogenicity (IRIS):	Not available
Carcinogenicity (OSHA):	This product is not known to contain any chemicals at reportable quantities that are listed as carcinogens by OSHA.
Other Considerations	Avoid prolonged or repeated skin contact to diesel fuels which can lead to dermal irritation and may be associated with an increased risk of skin cancer.

Environmental Not available Fate	Persistance/ N Bioaccumulation Potential	ot available
BOD5 and COD Not available	Products of N Biodegradation	ot available

Section 13. Disposal Considerations

Waste Disposal

Preferred waste management priorities are: (1) recycle or reprocess; (2) incineration with energy recovery; (3) disposal at licensed waste disposal facility. Ensure that disposal or reprocessing is in compliance with government requirements and local disposal regulations. Consult your local or regional authorities.

Section 14. Trans	port Information		
TDG Classification	Currently: Diesel Fuel, 3, UN1202, PGIII As of August 15, 2002: DIESEL FUEL, 3, UN1202, PGIII	Special Provisions for Transport	Not applicable.

Section 15. Regu	latory Information				
Other Regulations	This product is acceptable for use under the provisions of WHMIS-CPR. All components of this formulation are listed on the CEPA-DSL (Domestic Substances List).				
	All components of this formulation are listed	on the US EPA-TSCA Inv	rentory.		
	All components of this product are on the E	uropean inventory of Existi	ing Commercial Chemical Sub	ostances (EINECS).	
	This product has been classified in according the MSDS contains all of the information re		ia of the Controlled Products	Regulations (CPR) and	
	Please contact Product Safety for more info	ormation.

#### 3. HAZARDS IDENTIFICATION

Physical Description: Liquid Clear Typical Gasoline Odour

Routes of Exposure: Exposure may occur via inhalation, ingestion, skin absorption and skin or eye

contact.

<sup>\*</sup>An asterisk in the product name designates a trade-mark(s) of Shell Canada Limited, used under license by Shell Canada Products.

211-001

Revision Number: 4

Hazards:

Flammable Liquid. May cause cancer.

Vapours are moderately irritating to the eyes.

Ingestion may result in vomiting. Avoid aspiration of vomitus into lungs as small

quantities may result in aspiration pneumonitis.

May be absorbed by skin contact. Prolonged immersion in liquid may lead to

chemical burns.

Vapours are moderately irritating to the respiratory passages. The liquid when accidently aspirated into the lungs can cause a severe inflammation of the lung.

Excessive exposure to benzene may cause leukemia in man.

Handling: Eliminate all ignition sources.

Wear suitable gloves and eye protection.

Bond and ground transfer containers and equipment to avoid static accumulation.

Avoid prolonged exposure to vapours.

Empty containers are hazardous, may contain flammable / explosive dusts, liquid

residue or vapours. Keep away from sparks and open flames.

For further information on health effects, see Section 11.

## 4. FIRST AID

Eyes: Flush eyes with water for at least 15 minutes while holding eyelids open. If irritation

occurs and persists, obtain medical attention.

Skin: Wash contaminated skin with mild soap and water for 15 minutes. If irritation

occurs and persists, obtain medical attention.

Ingestion: DO NOT INDUCE VOMITING! OBTAIN MEDICAL ATTENTION IMMEDIATELY.

Guard against aspiration into lungs by having the individual turn on to their left side. If vomiting occurs spontaneously keep head below hips to prevent aspiration of

liquid into the lungs.

Inhalation: Remove victim from further exposure and restore breathing, if required. Obtain

medical attention.

Notes to Physician: The main hazard following accidental ingestion is aspiration of the liquid into the

lungs producing chemical pneumonitis. If more than 2.0 mL/kg has been ingested, vomiting should be induced with supervision. If symptoms such as loss of gag reflex, convulsions or unconsciousness occur before vomiting, gastric lavage with a

cuffed endotracheal tube should be considered.

## 5. FIRE FIGHTING MEASURES

Extinguishing Media: Dry Chemical

Carbon Dioxide

Foam Water Fog

Firefighting Instructions: Extremely flammable. Vapour forms a flammable/explosive mixture with air between upper and lower flammable limits. Vapours may travel along ground and flashback along vapour trail may occur. Product will float and can be reignited on surface of water. Do not use water except as a fog. Container areas exposed to direct flame contact should be cooled with large quantities of water as needed to prevent weakening of container structure. Containers exposed to intense heat from fires should be cooled with water to prevent vapour pressure buildup which could result in container rupture. Do not enter confined fire space without adequate protective clothing and an approved positive pressure self-contained breathing apparatus.

**Hazardous Combustion** 

Products:

Carbon dioxide, carbon monoxide and unidentified organic compounds may

be formed upon combustion.

#### 6. ACCIDENTAL RELEASE MEASURES

Issue warning "Flammable". Eliminate all ignition sources. Isolate hazard area and restrict access. Handling equipment must be grounded. Try to work upwind of spill. Avoid direct contact with material. Wear appropriate breathing apparatus (if applicable) and protective clothing. Stop leak only if safe to do so. Dike and contain land spills; contain water spills by booming. Use water fog to knock down vapours; contain runoff. Absorb residue or small spills with absorbent material and remove to non-leaking containers for disposal. Recommended materials: Clay or Sand Flush area with water to remove trace residue. Dispose of recovered material as noted under Disposal Considerations.

#### 7. HANDLING AND STORAGE

Handling: Extremely flammable. Fixed equipment as well as transfer containers and equipment

> should be grounded to prevent accumulation of static charge. Avoid all direct contact with this material. Avoid prolonged or repeated inhalation of vapours. Vapours may accumulate and travel to distant ignition sources and flashback. Do not cut, drill, grind, weld or perform similar operations on or near containers. Do not use as a cleaning solvent. Never siphon by mouth. Empty containers are hazardous, may contain flammable/explosive dusts, residues or vapours. Launder contaminated clothing prior to reuse. Wash with soap and water prior

to eating, drinking, smoking, applying cosmetics or using toilet facilities.

Store in a cool, dry, well ventilated area, away from heat and ignition sources. Protect Storage:

against physical damage to containers.

#### 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

THE FOLLOWING INFORMATION, WHILE APPROPRIATE FOR THIS PRODUCT, IS GENERAL IN NATURE. THE SELECTION OF PERSONAL PROTECTIVE EQUIPMENT WILL VARY DEPENDING ON THE CONDITIONS OF USE.

OCCUPATIONAL EXPOSURE LIMITS (Current ACGIH TLV/TWA unless otherwise noted):

Gasoline: 300 ppm (STEL: 500 ppm) Benzene (skin): 0.5 ppm (STEL: 2.5 ppm)

Skin Notation: The occupational exposure limit is based on the fact that skin and/or eye is a major route of

exposure through absorption.

Mechanical Use explosion-proof ventilation as required to control vapour concentrations.

Ventilation: Concentrations in air should be maintained below lower explosive limit at all times or

below the recommended threshold limit value if unprotected personnel are involved. Make up air should always be supplied to balance air exhausted (either generally or locally). For personnel entry into confined spaces (i.e. bulk storage tanks) a proper confined space entry procedure must be followed including ventilation and testing of

tank atmosphere.

#### PERSONAL PROTECTIVE EQUIPMENT:

Eye Protection: Chemical safety goggles and/or full face shield to protect eyes and face, if product

is handled such that it could be splashed into eyes. Provide an eyewash station in

the area.

Skin Protection: Impervious gloves should be worn at all times when handling this product. PVC or

nitrile rubber gloves are recommended. In confined spaces or where the risk of skin exposure is much higher, impervious clothing should be worn. Safety showers

should be available for emergency use.

Respiratory If exposure exceeds occupational exposure limits, use an appropriate NIOSH-

Protection: approved respirator. Use a NIOSH-approved chemical cartridge respirator with

organic vapour cartridges. For high airborne concentrations, use a NIOSH-approved supplied-air respirator, either self-contained or airline breathing apparatus, operated

in positive pressure mode.

## 9. PHYSICAL DATA

Physical State: Liquid Appearance: Clear

Odour: Typical Gasoline Odour

Odour Threshold: <0.25 ppm
Freezing/Pour Point: Not available
Boiling Point: 35 - 220 degrees C

Density: 720 - 730 kg/m3 @ 15 degrees C

Vapour Density (Air = 1): 3.5

Vapour Pressure (absolute): Not available pH: Not applicable

Flash Point: Method Tag Closed Cup -30 degrees C

Lower Explosion Limit: 1.4 % (vol.)
Upper Explosion Limit: 7.6 % (vol.)
Autoignition Temperature: 280 degrees C

Viscosity: <1 cSt @ 38 degrees C

Evaporation Rate (n-BuAc = 1): Not available

Partition Coefficient (K<sub>ow</sub>): 200 Water Solubility: Insoluble

Other Solvents: Hydrocarbon Solvents

## 10. STABILITY AND REACTIVITY

Chemically Stable: Yes
Hazardous Polymerization: No
Sensitive to Mechanical Impact: No
Sensitive to Static Discharge: Yes

Incompatible Materials: Avoid strong oxidizing agents.

Conditions of Reactivity: Avoid excessive heat, formation of vapours or mists.

## 11. TOXICOLOGICAL INFORMATION

Ingredient (or Product if not specified) Toxicological Data

Gasoline, Natural LD50 Oral Rat = 18800 mg/kg

LD50 Dermal Rabbit >8000 mg/kg

Benzene LD50 Oral Rat = 930 - 5600 mg/kg

LC50 Inhalation Rat = 13700 ppm for 4 hours

Routes of Exposure: Exposure may occur via inhalation, ingestion, skin absorption and skin or eye

contact.

Irritancy: Based on testing with similar materials, this product is not expected to be a

primary skin irritant after exposure of short duration, would not be a skin

sensitizer and would not be irritating to the eye.

Chronic Effects: Prolonged and repeated contact with skin can cause defatting and drying of the

skin resulting in skin irritation and dermatitis. Prolonged exposure to high vapour concentration can cause headache, dizziness, nausea, blurred vision and central nervous system depression. Prolonged and repeated exposure may cause

serious injury to blood forming organs, resulting in anemia and similar conditions.

Carcinogenicity and

Mutagenicity:

According to the International Agency for Research on Cancer (IARC) this product is considered to be possibly carcinogenic to humans. Epidemiological

studies indicate that long term inhalation of benzene vapour can cause leukaemia in man. Benzene has also produced chromosomal aberrations in

peripheral blood lymphocytes.

## 12. ECOLOGICAL INFORMATION

Environmental

Effects:

Do not allow product or runoff from fire control to enter storm or sanitary sewers, lakes, rivers, streams, or public waterways. Block off drains and ditches. Provincial regulations require and federal regulations may require that environmental and/or other agencies be notified of a spill incident. Spill area must be cleaned and restored to original condition or to the satisfaction of authorities. May be harmful to aquatic life. Fish Toxicity: 5 to 40 ppm | 96 hr TLm | Rainbow Trout | Freshwater

TEM | Rainbow Trout | Freshwat

Biodegradability: Not readily biodegradable. Potential for bioaccumulation. Rapid volatilization.

## 13. DISPOSAL CONSIDERATIONS

Waste management priorities (depending on volumes and concentration of waste) are: 1. recycle (reprocess), 2. energy recovery (cement kilns, thermal power generation), 3. incineration, 4. disposal at a licenced waste disposal facility. Do not attempt to combust waste on-site. Incinerate at a licenced waste disposal site with approval of environmental authority.

### 15. REGULATORY INFORMATION

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all the information required by the CPR.

WHMIS Class: Class B2 Flammable Liquid

Class D2A Other Toxic Effects - Carcinogen

DSL/NDSL Status: This product, or all components, are listed on the Domestic Substances

List, as required under the Canadian Environmental Protection Act. This product and/or all components are listed on the U.S. EPA TSCA Inventory.

Other Regulatory Status: No Canadian federal standards.

## 16. ADDITIONAL INFORMATION

LABEL STATEMENTS

Hazard Statement : Flammable Liquid.

May cause cancer.

Handling Statement: Eliminate all ignition sources.

Wear suitable gloves and eye protection.

Bond and ground transfer containers and equipment to avoid static accumulation.

Avoid prolonged exposure to vapours.

Empty containers are hazardous, may contain flammable / explosive dusts,

liquid residue or vapours. Keep away from sparks and open flames.

First Aid Statement: Wash contaminated skin with soap and water.

Flush eyes with water.

If overcome by vapours remove to fresh air.

Do not induce vomiting. Obtain medical attention.

Revisions: This MSDS has been reviewed and updated.

Changes have been made to:

SHELL JET B

141-012

Revision Number: 8

## Shell Canada Limited **Material Safety Data Sheet**

Effective Date: 2002-08-14 Supersedes: 2001-01-08

Class B2 Flammable

Liquid

Effects - Skin Irritant

Class D2B Other Toxic Class D2A Other Toxic Effects - Carcinogen

## 1. PRODUCT AND COMPANY IDENTIFICATION

PRODUCT:

SHELL JET B

SYNONYMS:

WIDE BOILING RANGE AVIATION TURBINE FUEL

PRODUCT USE: MSDS Number:

141-012

MANUFACTURER

Shell Canada Limited P.O. Box 100, Station M

400-4th Ave. S.W.

Calgary, AB Canada

This MSDS was prepared by the Toxicology and Material Safety Section of Shell Canada Limited.

## 2. COMPOSITION/INFORMATION ON INGREDIENTS

WHMIS Controlled CBI Claim No. Component Name **CAS Number** % **CBI** Date Range

Naphtha (Petroleum), Full-range

68919-37-9

Yes

Reformed Benzene

71-43-2

0.5 - 1.5Yes

>95

See Section 8 for Occupational Exposure Guidelines.

#### 3. HAZARDS IDENTIFICATION

Physical Description: Liquid Bright Clear Typical Gasoline Odour

Page 1 of 7

<sup>\*</sup>An asterisk in the product name designates a trade-mark(s) of Shell Canada Limited, used under license by Shell Canada Products.

SHELL JET B 141-012

Revision Number: 8

Routes of Exposure: Exposure may occur via inhalation, ingestion, skin absorption and skin or eye

contact.

Hazards:

Flammable Liquid. Irritating to skin. Contains Benzene. May cause cancer.

Vapours are moderately irritating to the eyes.

Vapours are moderately irritating to the respiratory passages. The liquid when accidently aspirated into the lungs can cause a severe inflammation of the lung.

Excessive exposure to benzene may cause leukemia in man.

Handling: Eliminate all ignition sources.

Wear suitable gloves and eye protection.

Bond and ground transfer containers and equipment to avoid static

accumulation.

Avoid prolonged exposure to vapours.

Empty containers are hazardous, may contain flammable / explosive dusts,

liquid residue or vapours. Keep away from sparks and open flames.

For further information on health effects, see Section 11.

## 4. FIRST AID

Eyes Flush eyes with water for at least 15 minutes while holding eyelids open. If

irritation occurs and persists, obtain medical attention.

Skin Wash contaminated skin with mild soap and water for 15 minutes. If irritation

occurs and persists, obtain medical attention.

Ingestion DO NOT INDUCE VOMITING! OBTAIN MEDICAL ATTENTION IMMEDIATELY.

Guard against aspiration into lungs by having the individual turn on to their left side. If vomiting occurs spontaneously keep head below hips to prevent aspiration

of liquid into the lungs.

Inhalation Remove victim from further exposure and restore breathing, if required. Obtain

medical attention.

Notes to Physician 
The main hazard following accidental ingestion is aspiration of the liquid into the

lungs producing chemical pneumonitis. If more than 2.0 mL/kg has been ingested, vomiting should be induced with supervision. If symptoms such as loss of gag reflex, convulsions or unconsciousness occur before vomiting, gastric lavage with

a cuffed endotracheal tube should be considered.

## 5. FIRE FIGHTING MEASURES

Extinguishing Media Dry Chemical

Carbon Dioxide

Foam Water Fog

#### Firefighting Instructions

Extremely flammable. Vapour forms a flammable/explosive mixture with air between upper and lower flammable limits. Vapours may travel along ground and flashback along vapour trail may occur. Do not use water except as a fog. Use water to cool fire exposed containers. Product will float and can be reignited on surface of water. Containers exposed to intense heat from fires should be cooled with water to prevent vapour pressure buildup which could result in container rupture. Container areas exposed to direct flame contact should be cooled with large quantities of water as needed to prevent weakening of container structure. Always stay away from ends of containers due to explosive potential. Fight fire from maximum distance. Do not enter confined fire space without adequate protective clothing and an approved positive pressure self-contained breathing apparatus.

#### Hazardous Combustion Products

A complex mixture of airborne solid, liquid, particulates and gases will evolve when this material undergoes pyrolysis or combustion. Carbon dioxide, carbon monoxide and unidentified organic compounds may be formed upon combustion.

#### 6. ACCIDENTAL RELEASE MEASURES

Issue warning "Flammable". Eliminate all ignition sources. Handling equipment must be grounded. Isolate hazard area and restrict access. Try to work upwind of spill. Avoid direct contact with material. Saturated clothing should be immediately removed to avoid flammability hazard. Wear appropriate breathing apparatus (if applicable) and protective clothing. Stop leak only if safe to do so. Dike and contain land spills; contain water spills by booming. Use water fog to knock down vapours; contain runoff. For large spills remove by mechanical means and place in containers. Absorb residue or small spills with absorbent material and remove to non-leaking containers for disposal. Recommended materials: Clay or Sand Flush area with water to remove trace residue. Dispose of recovered material as noted under Disposal Considerations. Notify appropriate environmental agency(ies).

### 7. HANDLING AND STORAGE

## Handling:

Extremely flammable. Avoid excessive heat, sparks, open flames and all other sources of ignition. Fixed equipment as well as transfer containers and equipment should be grounded to prevent accumulation of static charge. Vapours are heavier than air and will settle and collect in low areas and pits, displacing breathing air. Extinguish pilot lights, cigarettes and turn off other sources of ignition prior to use and until all vapours are gone. Vapours may accumulate and travel to distant ignition sources and flashback. Do not cut, drill, grind, weld or perform similar operations on or near containers. Empty containers are hazardous, may contain flammable/explosive dusts, residues or vapours. Do not pressurize drum containers to empty them. Never siphon by mouth. Wash with soap and water prior to eating, drinking, smoking, applying cosmetics or using toilet facilities. Launder contaminated clothing prior to reuse. Use good personal hygiene. Use explosion-proof ventilation to prevent vapour accumulation. Keep container tightly

Storage:

closed.

## 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

THE FOLLOWING INFORMATION, WHILE APPROPRIATE FOR THIS PRODUCT, IS GENERAL IN NATURE. THE SELECTION OF PERSONAL PROTECTIVE EQUIPMENT WILL VARY DEPENDING ON

SHELL JET B 141-012
Revision Number: 8

#### THE CONDITIONS OF USE.

Occupational Exposure

Limits (2000):

North American exposure limits have not been established for the product.

Consult local authorities for acceptable provincial values.

Gasoline: 300 ppm (STEL: 500 ppm) Benzene (skin): 0.5 ppm (STEL: 2.5 ppm)

Mechanical Ventilation: Make up air should always be supplied to balance air exhausted (either

generally or locally). Concentrations in air should be maintained below lower explosive limit at all times or below the recommended threshold limit value if unprotected personnel are involved. For personnel entry into confined spaces (i.e. bulk storage tanks) a proper confined space entry procedure must be followed including ventilation and testing of tank atmosphere. Use explosion-proof ventilation as required to control vapour concentrations.

PERSONAL PROTECTIVE EQUIPMENT:

Eye Protection: Chemical safety goggles and/or full face shield to protect eyes and face, if

product is handled such that it could be splashed into eyes. Provide an

eyewash station in the area.

Skin Protection: Impervious gloves (viton, nitrile) should be worn at all times when handling

this material. In confined spaces or where the risk of skin exposure is much higher, impervious clothing should be worn. Safety showers should

be available for emergency use.

Respiratory Protection: If exposure exceeds occupational exposure limits, use an appropriate

NIOSH-approved respirator. Use a NIOSH-approved chemical cartridge respirator with organic vapour cartridges or use a NIOSH-approved supplied-air respirator. For high airborne concentrations, use a NIOSH-approved supplied-air respirator, either self-contained or airline breathing

apparatus, operated in positive pressure mode.

## 9. PHYSICAL DATA

Physical State: Liquid
Appearance: Bright Clear

Odour: Typical Gasoline Odour

Odour Threshold: Not available
Freezing/Pour Point: <-51 degrees C
Boiling Point: 60 - 270 degrees C

Density: 750 - 801 kg/m3 @ 15 degrees C

Vapour Density (Air = 1): Not available

Vapour Pressure: >42 mm Hg @ 38 degrees C

Specific Gravity (Water = 1): 0.000

pH: Not applicable

Flash Point: Method Tag Closed Cup = -23 - 1 degrees C

Lower Explosion Limit: 1.4 % (vol.)
Upper Explosion Limit: 7.6 % (vol.)
Autoignition Temperature: Not available
Viscosity: Not available
Evaporation Rate (n-BuAc = 1): Not available

Partition Coefficient (K<sub>ow</sub>): Not available Unsoluble

Other Solvents: Hydrocarbon Solvents

Page 4 of 7

SHELL JET B 141-012

Revision Number: 8

#### 10. STABILITY AND REACTIVITY

Chemically Stable: Yes
Hazardous Polymerization: No
Sensitive to Mechanical Impact: No
Sensitive to Static Discharge: Yes

Hazardous Decomposition Products: Thermal decomposition products are highly dependent on

combustion conditions.

Incompatible Materials: Avoid contact with strong oxidizing agents and acids.

Conditions of Reactivity: Avoid excessive heat, open flames and all ignition sources.

#### 11. TOXICOLOGICAL INFORMATION

Ingredient (or Product if not specified)

Naphtha (Petroleum), Full-range Reformed

Benzene

Toxicological Data LD50 Oral Rat >28 mL/kg

LD50 Oral Rat = 930 - 5600 mg/kg

LC50 Inhalation Rat = 13700 ppm for 4 hours

Routes of Exposure: Exposure may occur via inhalation, ingestion, skin absorption and skin or

eye contact.

Irritancy: This product is expected to be irritating to skin but is not predicted to be a

skin sensitizer.

Chronic Effects: Prolonged and repeated contact with skin can cause defatting and drying

of the skin resulting in skin irritation and dermatitis. Prolonged exposure to high vapour concentration can cause headache, dizziness, nausea, blurred vision and central nervous system depression. Prolonged and repeated exposure may cause serious injury to blood forming organs, resulting in

anemia and similar conditions.

Pre-existing Conditions: Pre-existing eye, skin and respiratory disorders may be aggravated by

exposure to this product.

Carcinogenicity and

Mutagenicity:

This product contains benzene. Epidemiological studies indicate that long term inhalation of benzene vapour can cause leukaemia in man. Benzene

has also produced chromosomal aberrations in peripheral blood

lymphocytes. Carcinogenic hazard.

## 12. ECOLOGICAL INFORMATION

Environmental Effects Do not allow product or runoff from fire control to enter storm or sanitary

sewers, lakes, rivers, streams, or public waterways. Block off drains and ditches. Provincial regulations require and federal regulations may require that environmental and/or other agencies be notified of a spill incident. Spill area must be cleaned and restored to original condition or to the satisfaction of authorities. May be harmful to aquatic life. May cause

physical fouling of aquatic organisms.

Biodegradability Not readily biodegradable. Potential for bioaccumulation.

## 13. DISPOSAL CONSIDERATIONS

SHELL JET B 141-012

Revision Number: 8

Waste management priorities (depending on volumes and concentration of waste) are: 1. recycle (reprocess), 2. energy recovery (cement kilns, thermal power generation), 3. incineration, 4. disposal at a licenced waste disposal facility. Do not attempt to combust waste on-site. Incinerate at a licenced waste disposal site with approval of environmental authority.

## 14. TRANSPORTATION INFORMATION

## Canadian Road and Rail Shipping Classification:

UN/NA Number UN1863

Proper Shipping Name FUEL, AVIATION, TURBINE ENGINE

Hazard Class Class 3 Flammable Liquids

Packing Group PG II

Shipping Description FUEL, AVIATION, TURBINE ENGINE Class 3 UN1863 PG II

#### 15. REGULATORY INFORMATION

This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and the MSDS contains all the information required by the CPR.

WHMIS Class: Class B2 Flammable Liquid

Class D2B Other Toxic Effects - Skin Irritant
Class D2A Other Toxic Effects - Carcinogen

DSL/NDSL Status: This product, or all components, are listed on the Domestic Substances

List, as required under the Canadian Environmental Protection Act. This product and/or all components are listed on the U.S. EPA TSCA Inventory.

Other Regulatory Status: No Canadian federal standards.

#### 16. ADDITIONAL INFORMATION

LABEL STATEMENTS

Hazard Statement : Flammable Liquid

Irritating to skin.
Contains Benzene.
May cause cancer.

Handling Statement: Eliminate all ignition sources.

Wear suitable gloves and eye protection.

Bond and ground transfer containers and equipment to avoid static

accumulation.

Avoid prolonged exposure to vapours.

Empty containers are hazardous, may contain flammable / explosive dusts,

liquid residue or vapours. Keep away from sparks and open flames.

SHELL JET B 141-012
Revision Number: 8

First Aid Statement: Wash contaminated skin with soap and water.

Flush eyes with water.

If overcome by vapours remove to fresh air.

Do not induce vomiting.
Obtain medical attention.

Revisions: This revision reflects the change of name from Shell Canada Products

Limited to Shell Canada Products.

This MSDS has been reviewed and updated.

Changes have been made to:

Section 14
