RE: NWB Licence No. 2BE-KIM1011

Dear Ms. Weston:

Please find attached the renewal Licence No. **2BE-KIM1011** issued to True North Gems Inc. by the Nunavut Water Board (NWB) pursuant to its authority under Article 13 of the *Agreement between the Inuit of the Nunavut Settlement Area and Her Majesty the Queen in Right of Canada*. The terms and conditions of the attached Licence related to water use and waste disposal are an integral part of this approval.

If the Licensee contemplates the renewal of this Licence, it is the responsibility of the Licensee to apply to the NWB for its renewal. The past performance of the Licensee, new documentation and information, and issues raised during a public hearing, if the NWB is required to hold one, will be used to determine the terms and conditions of the Licence renewal. Note that if the Licence expires before the NWB issues a new one, then water use and waste disposal must cease, or the Licensee will be in contravention of the *Nunavut Land Claims Agreement* and the *Nunavut Waters and Nunavut Surface Rights Tribunal Act*. However, the expiry or cancellation of a licence does not relieve the holder of the Licence from any obligations imposed by the licence. The NWB recommends that an application for the renewal of this Licence be filed at least three months prior to the Licence expiry date.

If the Licensee contemplates or requires an amendment to this licence, the NWB may decide, in the public interest, to hold a public hearing. The Licensee should submit applications for amendment as soon as possible to give the NWB sufficient time to go through the amendment process. The process and timing may vary depending on the scope of the amendment; however a minimum of sixty (60) days is required from time of acceptance by the NWB. It is the responsibility of the Licensee to ensure that all application materials have been received and acknowledged by the Manager of Licensing.

The NWB strongly recommends that the Licensee consult the comments submitted by interested persons on issues identified. INAC recommend that the Licensee immediately backfill all trenches identified by INAC District Geologist in 2008 as well as sample and analyze for hydrocarbons in accumulated water within the temporary secondary fuel containment area. GN-CLEY stated that the project area was in proximity of nine kilometres of a known archaeological site. This information is attached for your consideration.¹

Sincerely,

Thomas Kabloona
Nunavut Water Board Chair

DECISION

LICENCE NUMBER: 2BE-KIM1011

This is the decision of the Nunavut Water Board (NWB) with respect to an application dated March, 2010 for the renewal of a Water Licence made by:

TRUE NORTH GEMS INC.

to allow for the use of water and the deposit of waste operations and activities related to exploration, including prospecting and geological mapping at the Beluga Sapphire Project located within the Qikiqtani Region, Nunavut, generally located at the geographical coordinates as follows:

Latitude: 62°47'N to 62°50'N Longitude: 69°51' to 69°55'W

DECISION

On July 12, 2005, True North Gems Inc., filed an application with the NWB for the use of water and the deposit of waste during drilling and mechanized trenching/stripping that constituted part of a “mini bulk” sampling program at the Beluga Sapphire Project, located within the Qikiqtani Region, Nunavut, at the general coordinates of 62°47' to 62°50'N latitude and 69°51' to 69°55'W longitude. The “mini-bulk” sampling program involved the use of a diamond blade chainsaw and/or the use of expandable mud to obtain rock samples.

Following the application, the NWB received from the Applicant supplemental information and a revised spill contingency plan on July 26, 2005 and on April 24, 2006 respectively. NWB staff reviewed the application and accompanying information and determined that the submission satisfied the conditions required to proceed to the following stages of the regulatory process, which also included a thirty day review by interested persons and parties.

After reviewing the initial and subsequent submissions from the Applicant and representations made by interested persons, the NWB issued on May 5, 2006, a three (3) year licence, to True North Gems Inc. That licence expired on December 31, 2009.

Based on the information provided to the NWB, True North Gems completed in 2006 its diamond drill program and initialized financial and geological models from the data obtained. In 2007 the company expanded its claims around the town of Kimmirut to encompass more of the prospective Lake Harbour Group marbles. In 2008 the exploration activities were split between the main Kimmirut work site and a newly acquired prospecting permit under a different water licence. An extensive UV exploration survey, mapping and geophysical activities were conducted on the Kimmirut site in that same year. In 2009 the term of the Licence 2BE-KIM0609 culminated with activities that were limited to Kimmirut town site, which included equipment maintenance, inspections of the known sapphire site, and minimal exploration activities.

On May 3, 2010, the NWB received an application from True North Gems Inc. requesting that License 2BE-KIM0609, which expired December 31, 2009, be renewed until December 31, 2010. Under the application, True North Gems Inc. requested the use of water for the purpose of washing rocks during exploration activities that include prospecting and geological mapping at the Beluga Sapphire Project located in the Qikiqtani Region, Nunavut. The use of a camp and the deposit of municipal waste were not requested in the renewal application as the program would be based out of Kimmirut.

NWB staff reviewed the renewal application and accompanying submissions and determined that the application was complete and proceeded through the regulatory process. Accordingly, and pursuant to subsection 55(4) of the *Nunavut Waters and Nunavut Surface Rights Tribunal Act*,¹ the NWB distributed the application for a thirty-review period.

Comments were received from Indian and Northern Affairs Canada (INAC), Environment Canada (EC) and, Government of Nunavut-Community, Language, Elders and Youth (GN-CLEY). Both EC and INAC recommended that the Licensee backfill previously trenched and excavated areas to preexisting conditions. CLEY stated that the project area is approximately nine kilometers from a known archaeological site.

Terms and conditions are added to the Licence to address comments contained in submissions by various parties including the requirement for the Licensee to backfill previously excavated areas, restore “mini-bulk” sampling locations, address minor deficiencies in the Spill Contingency Plan (SCP) during the annual review of the Plan and provide the Board with an addendum to the Abandonment and Restoration Plan (A&RP) within thirty (30) days following the renewal of this licence.

Following the receipt of submissions from interested parties, the Licensee indicated that a one-year term was required instead of the term initially stated in the licence application. In accordance with the *Nunavut Waters and Nunavut Surface Rights Tribunal Act*, on July 14, 2010, the NWB distributed the information pertaining to changing the term of the licence to one year, for a thirty-day review. Comments were received from EC, which referenced its previous submissions.

After having been satisfied that the application was for a location that falls outside of an area with an approved Land Use Plan¹ and exempt from the requirement for screening as described within Schedule 12-1 by the Nunavut Impact Review Board² in accordance with Article 12 of the *Nunavut Land Claim Agreement (NLCA)*, the NWB decided that the application could proceed through the regulatory process. In accordance with S.55.1 of the *Nunavut Waters and Nunavut Surface Rights Tribunal Act (NWNSRTA)* and Article 13 of the *NLCA*, public notice of the application was given and interested persons were invited to make representations to the NWB.

After reviewing the submission of the Applicant and considering the representations made by interested persons, the NWB, having given due regard to the facts and circumstances, the merits

¹ NPC Conformity Decision, Dated May 11, 2010

² NIRB Screening Decision, Dated May 6, 2010

of the submissions made to it and to the purpose, scope and intent of the *NLCA* and of the *NWNSRTA*, waived the requirement to hold a public hearing, and determined that:

Licence No. 2BE-KIM0609 be renewed as Licence No. 2BE-KIM1011 subject to the terms and conditions contained therein. (Motion #: 2010-15-L11)

SIGNED this 21st day of September, 2010 at Gjoa Haven, NU.

Thomas Kabloona
Nunavut Water Board Chair

TK/sj/ip

**NUNAVUT WATER BOARD
WATER LICENCE**

Pursuant to the *Nunavut Waters and Nunavut Surface Rights Tribunal Act* and the *Agreement Between the Inuit of the Nunavut Settlement Area and Her Majesty the Queen in right of Canada*, the Nunavut Water Board, hereinafter referred to as the Board, hereby grants to

TRUE NORTH GEMS INC.

(Licensee)

500-602 WEST HASTINGS STREET, VANCOUVER, BC V6B 1P2

(Mailing Address)

hereinafter called the Licensee, the right to alter, divert or otherwise use water or dispose of waste for a period subject to restrictions and conditions contained within this Licence renewal:

Licence Number/Type: **2BE-KIM1011 TYPE "B"**

Water Management Area: **NUNAVUT 05**

Location: **BELUGA SAPPHIRE PROJECT
KIMMIRUT, QIKIQTANI REGION, NUNAVUT**

Classification: **MINING & MILLING UNDERTAKING**

Purpose: **DIRECT WATER USE AND WASTE DEPOSAL**

Quantity of Water use not
to Exceed: **FIVE (5) CUBIC METRES PER YEAR**

Date of Licence Issuance: **SEPTEMBER 21, 2010**

Expiry of Licence: **DECEMBER 31, 2011**

This Licence, issued and recorded at Gjoa Haven, Nunavut, includes and is subject to the annexed conditions.

**Thomas Kabloona,
Nunavut Water Board Chair**

PART A: SCOPE, DEFINITIONS AND ENFORCEMENT

1. Scope

This Licence allows for the use of water and the disposal of waste for a Mining and Milling undertaking classified as per Schedule II of the *Regulations* at the Beluga Sapphire Project, located approximately 1.7 km to 2.7 km southwest of Kimmirut, within the Qikiqtani Region, Nunavut.

- a. This Licence is issued subject to the conditions contained herein with respect to the taking of water and the depositing of waste of any type in any waters or in any place under any conditions where such waste or any other waste that results from the deposits of such waste may enter any waters. Whenever new Regulations are made or existing *Regulations* are amended by the Governor in Council under the *Nunavut Waters and Nunavut Surface Rights Tribunal Act*, or other statutes imposing more stringent conditions relating to the quantity or type of waste that may be so deposited or under which any such waste may be so deposited, this Licence shall be deemed, upon promulgation of such Regulations, to be subject to such requirements; and
- b. Compliance with the terms and conditions of this Licence does not absolve the Licensee from responsibility for compliance with the requirements of all applicable Federal, Territorial and Municipal legislation.

2. Definitions

“Act” means the *Nunavut Waters and Nunavut Surface Rights Tribunal Act*;

“Addendum” means the supplemental text that is added to a full plan or report usually included at the end of the document and is not intended to require a full resubmission of the revised report.

“Amendment” means a change to original terms and conditions of this Licence requiring correction, addition or deletion of specific terms and conditions of the Licence; modifications inconsistent with the terms of the set terms and conditions of the Licence;

“Appurtenant Undertaking” means an undertaking in relation to which a use of water or a deposit of waste is permitted by a licence issued by the Board;

“Board” means the Nunavut Water Board established under the *Nunavut Land Claims Agreement* and the *Nunavut Waters and Nunavut Surface Rights Tribunal Act*;

“Engineer” means a professional engineer registered to practice in Nunavut in accordance with the Engineering, Geological and Geophysical Act (Nunavut) S.N.W.T. 1998, c.38, s.5;

“Greywater” means all liquid wastes from showers, baths, sinks, kitchens and domestic washing facilities, but does not include toilet wastes;

“Inspector” means an Inspector designated by the Minister under Section 85 (1) of the *Act*;

“Licensee” means the holder of this Licence;

“Modification” means an alteration to a physical work that introduces a new structure or eliminates an existing structure and does not alter the purpose or function of the work, but does not include an expansion;

“Nunavut Land Claims Agreement” (NLCA) means the “*Agreement Between the Inuit of the Nunavut Settlement Area and Her Majesty the Queen in right of Canada*”, including its preamble and schedules, and any amendments to that agreement made pursuant to it;

“Regulations” means the *Northwest Territories Water Regulations* sor/93-303 8th June, 1993, omitting Section 5, Water Use or Waste Deposit Without a Licence;

“Spill Contingency Plan” means a Plan developed to deal with unforeseen petroleum and hazardous materials events that may occur during the operations conducted under the Licence;

“Sump” means an excavation in impermeable soil for the purpose of catching or storing water or waste;

“Waste” means, as defined in S.4 of the *Act*, any substance that, by itself or in combination with other substances found in water, would have the effect of altering the quality of any water to which the substance is added to an extent that is detrimental to its use by people or by any animal, fish or plant, or any water that would have that effect because of the quantity or concentration of the substances contained in it or because it has been treated or changed, by heat or other means.

3. **Enforcement**

- a. Failure to comply with this Licence will be a violation of the *Act*, subjecting the Licensee to the enforcement measures and the penalties provided for in the *Act*;
- b. All inspection and enforcement services regarding this Licence will be provided by Inspectors appointed under the *Act*; and
- c. For the purpose of enforcing this Licence and with respect to the use of water and deposit or discharge of waste by the Licensee, Inspectors appointed under the *Act*, hold all powers, privileges and protections that are conferred upon them

by the *Act* or by other applicable law.

PART B: GENERAL CONDITIONS

1. The water use fees of \$30, payable to the Receiver General for Canada, shall be sent to the Board annually for the right to the use of water in accordance with Section 9 of the *Regulations*.
2. The Licensee shall file an Annual Report on the appurtenant undertaking with the Board no later than March 31st of the year following the calendar year being reported, containing the following information:
 - a. A summary report of water use and waste disposal activities;
 - b. A list of unauthorized discharges and a summary of follow-up actions taken;
 - c. Any revisions to the Spill Contingency Plan and Abandonment and Restoration Plan, as required by Part B, Item 7, submitted in the form of an Addendum;
 - d. A description of all progressive and or final reclamation work undertaken, including photographic records of site conditions before, during and after completion of operations;
 - e. A summary of all information requested and results of the Monitoring Program; and
 - f. Any other details on water use or waste disposal requested by the Board by November 1 of the year being reported.
3. The Licensee shall notify the NWB of any changes in operating plans or conditions associated with this project at least thirty (30) days prior to any such change.
4. The Licensee shall install flow meters or other such devices, or implement suitable methods required for the measuring of water volumes as required under Part J, Item 1.
5. The Licensee shall, for all Plans submitted under this Licence, include a proposed timetable for implementation. Plans submitted, cannot be undertaken without subsequent written Board approval and direction. The Board may alter or modify a Plan if necessary to achieve the legislative objectives and will notify the Licensee in writing of acceptance, rejection or alteration of the Plan.
6. The Licensee shall, for all Plans submitted under this Licence, implement the Plan as approved by the Board in writing.
7. The Licensee shall review the Plans referred to in this Licence, as required by changes in operation and/or technology, and modify the Plan accordingly. Revisions to the Plans are to be submitted in the form of an Addendum to be included with the Annual Report.
8. Every Plan to be carried out pursuant to the terms and conditions of this Licence shall become a part of this Licence, and any additional terms and conditions imposed upon

approval of a Plan by the Board become part of this Licence. All terms and conditions of the Licence should be contemplated in the development of a Plan where appropriate.

9. The Licensee shall ensure a copy of this Licence is maintained at the site of operations at all times. Any communication with respect to this Licence shall be made in writing to the attention of:

(a) **Manager of Licensing:**

Nunavut Water Board
P.O. Box 119
Gjoa Haven, NU X0B 1J0
Telephone: (867) 360-6338
Fax: (867) 360-6369
Email: licensing@nunavutwaterboard.org

(b) **Inspector Contact:**

Manager of Field Operations, INAC
Nunavut District, Nunavut Region
P.O. Box 100
Iqaluit, NU X0A 0H0
Telephone: (867) 975-4295
Fax: (867) 979-6445

10. The Licensee shall submit one paper copy and one electronic copy of all reports, studies, and plans to the Board. Reports or studies submitted to the Board by the Licensee shall include a detailed executive summary in Inuktitut.
11. The Licensee shall ensure that any document(s) or correspondence submitted by the Licensee to the Board is received and acknowledged by the Manager of Licensing.
12. This Licence is assignable as provided for in Section 44 of the *Act*.

PART C: CONDITIONS APPLYING TO WATER USE

1. The Licensee shall obtain water for the purpose of washing rocks on a small scale from an unnamed source in proximity to the project site. Total water use shall not exceed five (5) cubic metres per year.
2. If the Licensee requires water in sufficient volume that the source water body may be drawn down the Licensee shall, at least thirty (30) days prior to commencement of use of water, submit to the Board for approval in writing, the following: volume required, hydrological overview of the water body, details of impacts, and proposed mitigation measures.
3. The Licensee shall equip all water intake hoses with a screen of an appropriate mesh

size to ensure that fish are not entrained and shall withdraw water at a rate such that fish do not become impinged on the screen.

4. The Licensee shall not remove any material from below the ordinary high water mark of any water body unless authorized.
5. The Licensee shall not cause erosion to the banks of any body of water and shall provide necessary controls to prevent such erosion.
6. Sediment and erosion control measures shall be implemented prior to and maintained during the operation to prevent entry of sediment into water.

PART D: CONDITIONS APPLYING TO WASTE DISPOSAL

1. The Licensee shall locate areas designated for waste disposal at a minimum distance of thirty one (31) metres from the ordinary high water mark of any water body such that the quality, quantity or flow of water is not impaired, unless otherwise approved by the Board in writing.
2. The Licensee shall not practice on-site land filling of domestic waste, unless otherwise approved by the Board in writing.
3. The Licensee is authorized to dispose of all acceptable food waste, paper waste and untreated wood products in an incinerator.
4. The Licensee shall not open burn plastics, wood treated with preservatives, electric wire, Styrofoam, asbestos or painted wood to prevent the deposition of waste materials of incomplete combustion and/or leachate from contaminated ash residual, from impacting any surrounding waters, unless otherwise approved by the Board in writing.
5. The Licensee shall provide to the Board documented authorization from Kimmirut in Nunavut receiving wastes from the Beluga Sapphire Project prior to any backhauling and disposal of wastes to that communities.
6. The Licensee shall backhaul and dispose of all hazardous wastes, waste oil and non-combustible waste generated through the course of the operation at an approved waste disposal site.
7. The Licensee shall maintain records of all waste backhauled and records of confirmation of proper disposal of backhauled waste. These records shall be made available to an Inspector upon request.
8. The Licensee shall contain all greywater in a sump located at a distance of at least thirty one (31) metres above the ordinary high water mark of any water body, at a site where direct flow into a water body is not possible and no additional impacts are created,

unless otherwise approved by the Board in writing.

PART E: CONDITIONS FOR CAMPS, ACCESS INFRASTRUCTURES AND OPERATIONS

1. No camp activities are authorized under the provisions of this Licence.
2. All activities shall be conducted in such a way as to minimize impacts on surface drainage and the Licensee shall immediately undertake any corrective measures in the event of any impacts on surface drainage.
3. Winter lake and stream crossings, including ice bridges, shall be constructed entirely of water, ice or snow. The Licensee should minimize disturbance by locating ice bridges in an area that requires the minimum approach grading and the shortest crossing route. Stream crossings shall be removed or the ice notched prior to spring break-up.
4. With respect to access road, pad construction or other earthworks, the deposition of debris or sediment into or onto any water body is prohibited. These materials shall be disposed a distance of at least thirty one (31) metres from the ordinary high water mark in such a fashion that they do not enter the water.

PART F: CONDITIONS APPLYING TO DRILLING OPERATIONS

1. The Licensee is not authorized to drill under the provisions of this Licence.

PART G: CONDITIONS APPLYING TO MODIFICATIONS

1. The Licensee may, without written consent from the Board, carry out Modifications to the Water Supply Facilities and Waste Disposal Facilities provided that such Modifications are consistent with the terms of this Licence and the following requirements are met:
 - a. the Licensee has notified the Board in writing of such proposed Modifications at least sixty (60) days prior to beginning the Modifications;
 - b. such Modifications do not place the Licensee in contravention of the Licence or the *Act*;
 - c. such Modifications are consistent with the NIRB Screening Decision;
 - d. the Board has not, during the sixty (60) days following notification of the proposed Modifications, informed the Licensee that review of the proposal will require more than sixty (60) days;
 - e. the Board has not rejected the proposed Modifications; and
 - f. modifications for which all of the conditions referred to above have not been met can be carried out only with written approval from the Board.

2. The Licensee shall provide as-built plans and drawings of the Modifications referred to in this Licence within ninety (90) days of completion of the Modification. These plans and drawings shall be stamped by an Engineer.

PART H: CONDITIONS APPLYING TO SPILL CONTINGENCY PLANNING

1. The Plan entitled “Spill Contingency Plan, Beluga Property, Kimmirut, Nunavut” revised January 2010, that was submitted as additional information with the Application has been approved with this Licence.
2. The Licensee shall, upon annual review of the plan as required by Part B, Item 7, include the following revisions:
 - a. Confirm the following contact information and revise accordingly: Field Operations Manager for INAC should be included in place of the Inspector (sec 4.0 and 4.1); NWB and NIRB phone numbers and fax numbers are to be corrected (sec. 4-1); and
 - b. Appendix 3 should include a copy of the new NT-NU Spill Report Form and the guide to using the electronic form.
3. The Licensee shall prevent any chemicals, petroleum products or wastes associated with the project from entering water. All sumps and fuel caches shall be located at a distance of at least thirty one (31) metres from the ordinary high water mark of any adjacent water body and inspected on a regular basis.
4. The Licensee shall ensure that any equipment maintenance and servicing be conducted only in designated areas and shall implement special procedures (such as the use of drip pans) to manage motor fluids and other waste and contain potential spills.
5. If during the term of this Licence, an unauthorized discharge of waste occurs, or if such a discharge is foreseeable, the Licensee shall:
 - a. Employ the approved Spill Contingency Plan;
 - b. Report the spill immediately to the 24-Hour Spill Line at (867) 920-8130 and to the Inspector at (867) 975-4295; and
 - c. For each spill occurrence, submit to the Inspector, no later than thirty (30) days after initially reporting the event, a detailed report that will include the amount and type of spilled product, the GPS location of the spill, and the measures taken to contain and clean up the spill site.

PART I: CONDITIONS APPLYING TO ABANDONMENT AND RESTORATION OR TEMPORARY CLOSING

1. The Plan entitled “Abandonment and Restoration Plan, Beluga Property, Kimmirut,

Nunavut” revised January 2010, that was submitted as additional information with the Application has been approved with this Licence.

2. The Licensee shall submit within thirty (30) days of issuance of the Licence, an Addendum to the Plan referred to in Part I, Item 1, to address the following:
 - a. Include procedures for backfilling excavated areas;
 - b. Provide the locations of all previous trenching activities that have occurred under this project in addition to mitigation measures that were implemented to limit the impacts to fresh water;
 - c. Provide a comprehensive update with respect to work completed or work scheduled to be completed in the immediate future to restore the locations that were affected by the mini-bulk sampling program as well as all other areas that have been impacted by activities of this project; and
 - d. Include information confirming the removal of all materials extracted from the mini bulk sampling program that was conducted between the years 2006 to 2009 under the expired Licence.
3. The Licensee shall complete all restoration work prior to the expiry of this Licence.
4. The Licensee shall carry out progressive reclamation of any components of the project no longer required for the Licensee’s operations.
5. The Licensee shall backfill and restore all sumps to the pre-existing natural contours of the land.
6. The Licensee shall remove from the site, all infrastructure and site materials, including all fuel caches, drums, barrels, buildings and contents, docks, water pumps and lines, material and equipment prior to the expiry of this Licence.
7. All roads and airstrip, if any, shall be re-graded to match natural contour to reduce erosion.
8. The Licensee shall remove any culverts and restore the drainage to match the natural channel. Measures shall be implemented to minimize erosion and sedimentation.
9. In order to promote growth of vegetation and the needed microclimate for seed deposition, all disturbed surfaces shall be prepared by ripping, grading, or scarifying the surface to conform to the natural topography.
10. Areas that have been contaminated by hydrocarbons from normal fuel transfer procedures shall be reclaimed to meet objectives as outlined in the Government of Nunavut’s Environmental Guideline for Site Remediation, January 2002. The use of reclaimed soils for the purpose of back fill or general site grading may be carried out only upon consultation and approval by the Government of Nunavut, Department of Environment and an Inspector.

11. The Licensee shall contour and stabilize all disturbed areas to a pre-disturbed state upon completion of work.

PART J: CONDITIONS APPLYING TO THE MONITORING PROGRAM

1. The Licensee shall measure and record, in cubic metres, the daily quantities of water utilized for cleaning rock on a small scale.
2. The Licensee shall provide the GPS co-ordinates (in degrees, minutes and seconds of latitude and longitude) of all locations where sources of water are utilized for all purposes.
3. The Licensee shall include in the Annual Report required under Part B, Item 2 all data, monitoring results and information required by this Part.
