RE: Land Use Permit N2005C0023 Kirwan Lake Camp and 2 related sites

On August 9th and 12th of 2011, I conducted Field Inspections at the above mentioned locations. A copy of my Inspection Report is attached.

Issues Identified during the inspection:

Site #1 Hope Lake Staging Area – This site has 27 empty drums, all marked TRIEX, at least 40 pieces of Drill Rod and a pallet with 6 to 8 busted bags of Calcium Chloride that need to be removed.

Site #2 Kirwan Lake Camp Site – This site is in a clean and natural state.

Site #3 Esker Airstrip and Fuel Cache – This site has a number of items that have been scattered around by wind and also damaged by bears. On the Esker there are 11 full drums, 2 empties, 19 white pails and signs of a spill of some sort. 4 drums and 1 pail are on the North side and 2 drums are on the West side.

Sites #1 & #3 must be cleaned up and all items removed, and a Final Plan must be submitted before I can close off this LUP. These need to be completed as soon as possible.

Please do not hesitate to contact me should you have any questions or comments.
