12-Jun-11	18:08	Northlands Dene	John Danttouze	Kiyuk Lake Project	e-mail from (with copy of April 22 letter to INAC), to QH re: Hi Quinton, I want to thank you for your text last week, much appreciated. Perhaps, I can explain the reason behind the letter which I send to the Department of Indian and Northern Affairs Canada now called (Aboriginal Affairs) lands department. The department has a fiduciary obligation to a duty to consult aboriginal user of the land. This project will bring economic snipoffs as well local business opportunities. I am fully in support of the proposed project, and my letter will reflect that view. If there is any economic opportunity, or rental of equipment it would a great benefit at this time. I will be traveling to my cabin shortly, I am currently waiting on Garry Gurke for travel arrangements. This would be a great beginning of working towards the development of this great opportunity for the region as a whole. If you require my cv, It will be available upon request. I look forward to your response. regards, john danttouze
13-Jun-11	11:21	Northlands Dene	John Danttouze	Kiyuk Lake Project	e-mail to, from QH re: I see. I will consider the boat/motor offer if we find ourselves in need of one. As for work...we are awaiting our permit as you are aware. It has now been delayed several months, and we do not expect it soon as they say they are quite busy. Once we have it, I will be in a better position to consider your offer. Hopefully, this will be in the next month or so. If not, our program may not happen this year. Cheers, QH

18-Aug-11	13:03	Hamlet of Arviat	John Main, CEDO	Kiyuk Lake Project	<p>e-mail tom from QH re: John:</p> <p>My name is Quinton Hennigh, Chief Geologist of Prosperity Goldfields. We spoke early this summer. I spoke with my project manager at Kiyuk this morning. The caribou have started coming through the area. Due to the limitations in our permit, we are required to stop using the drill and helicopter during migration, so this means our drill season has come to an end. Over the next 12-24 hours, they will pull the rig off the drill site and put it in camp for storage. Beyond that, we will only have operations in the camp...finishing sawing, construction and weatherizing things. I suspect this will take approximately a week.</p> <p>We have really appreciated the work the guys from Arviat have contributed to this project. I anticipate this being a going concern for a long time to come. In late September, I would like to meet with you and council to discuss things going forward. I have also emailed Alex Ishalook to let him know.</p> <p>Hope this finds you well. Happy hunting.</p> <p>Cheers,</p>

FROM: MANITOBA DENESULINE RE: UNDERSTANDINGS AND AGREEMENTS RELATING TO THE KIYUK LAKE PROJECT INTRODUCTION ! Both Sayisi Dene First Nation and Northlands First Nation have been very pleased with the relationship that has developed between the First Nations and Prosperity regarding the Kiyuk Lake project. ! The results have been very positive from both the community and mineral exploration and development perspectives. ! Over the last couple of years, there also has been very positive results at the North of 60 negotiating table. ! Today's meeting is to discuss how both the Kiyuk mineral development project and the land claims negotiations can continue to progress for the mutual benefit of the First Nations and Prosperity. ! Given the progress that has been made on both fronts, Sayisi Dene and Northlands leadership and land claims negotiators believe that it is time to begin more formal discussions that will lead to an agreement or series of agreements to guide the relationship into the future. ! From the Manitoba Denesuline's perspective, the overall purpose of these discussions will be to lead to a more formal understanding that will; • add certainty to both the mineral exploration and development</p>
