The Nunavut Water Board (NWB) has completed its preliminary technical review of the above-mentioned application, which determined that the following items need to be addressed before the application could proceed to the next stage of the licensing process:

1. The plan entitled Spill Prevention and Response Plan, dated June 2012, must be updated to address the following items:
 - a. Inclusion of changes to the company name to reflect the current name change;
 - b. Inclusion of changes to the "Effective Date" of the Plan; and
 - c. Inclusion of a site map depicting the locations of camp infrastructure, spill response equipment, nearby water bodies and other relevant details associated with the project.
2. The plan entitled Abandonment and Restoration Plan, dated June 2012, must be updated to address the following items:
 - a. Inclusion of changes to the company's name to reflect the current name change;
 - b. Inclusion of changes to the "Effective Date" of the Plan; and
 - c. Changes to all references made to Aboriginal Affairs and Northern Development Canada (AANDC) to reflect the recent name change of the organization, Indigenous and Northern Affairs Canada (INAC).
3. Confirmation on whether or not all of the issues identified by the inspector in 2015 have been addressed.
4. Confirmation on whether or not all pre-licensing issues have been addressed including an updated determination from the Nunavut Planning Commission (NPC) regarding the project. It should be noted that the generic NPC's letter, dated October 23, 2015, that has been provided is not specific to any particular water licence application. Further, the Nunavut Impact Review Board's (NIRB) Notice of Indication, dated May 31, 2011, is not necessarily applicable to this renewal application for the project.
