Good morning licensing,

On Monday we submitted comments on Northern Empire's type B renewal application for their Kiyuk Lake property.

When we were discussing this as a group yesterday, Ian noticed this property is in the corner of the territory where the Denesulina and Dene are also making land claims. Karen thought that these groups may also want to comment on the renewal application.

I spoke with Karén yesterday to see if these groups had been made aware of the licensing process. He recommended I write to the general licensing email with this request.

Wishing you a good day,
Sarah
