Hi Michael,

The Nunavut Water Board (NWB or Board) is currently undertaking the final technical review for the above-mentioned application.

To assist the Board with completing its review, the following items should be addressed:

1. Block 9 of the water licence application form indicates that lake-based and on-land drilling activities are associated with the project. However, inadequate information was provided regarding the lake(s) where drilling will occur, conditions under which lake-based drilling will be undertaken, the extent of lake-based drilling activities, management plan(s) and best practices developed to minimize or prevent potential negative impacts to the lake(s) involved, and a monitoring plan or program to support lake-based drilling activities.
2. Clarification is required on whether any drilling activities will be conducted within 31-metres of the ordinary high water mark of any water bodies.

If you have any questions regarding the above, please contact me at your earliest convenience.

Regards,
Sean
